PUBLIC LAND STATISTICS 2024

Volume 209

June 2025

BLM/OC/ST-25/003+1165

P-108-14

WELCOME TO *PUBLIC LAND STATISTICS 2024*

Welcome to the 2024 edition of *Public Land Statistics* (PLS), published by the U.S. Department of the Interior, Bureau of Land Management (BLM). The 90-plus tables provide numerical data and detailed footnotes related to the BLM's mission, programs, and accomplishments. Many tables summarize a vast amount of detailed information. To correctly interpret the data, it is important to read the footnotes in their entirety.

Many of the minor acreage changes from one year to the next occur because:

1. Inholdings have been acquired, or some other land exchange has taken place during the year.

2. Improved geographic information system (GIS) mapping of land boundaries has enabled the BLM to recalculate the total acres within the units.

Note that data presented in the 2024 PLS tables may not exactly match data in other BLM publications covering fiscal year (FY) 2024 operations and accomplishments. Such discrepancies occur because the databases that provide table data are not static and they are constantly being updated to provide the latest information, sometimes many months after the end of the fiscal year.

The BLM remains committed to publishing a PLS report each year that is timely, complete, and as helpful as possible to readers. The current edition and past editions of PLS are available online at: https://www.blm.gov/about/data/public-land-statistics.

TABLE OF CONTENTS

Table No.		Page
PART 1	**LAND RESOURCES AND INFORMATION**	1
1-1	Acquisition of the Public Domain, 1781–1867	3
---	Acquisitions (Map)	4
1-2	Disposition of the Public Domain, 1781–2024	5
1-3	Mineral and Surface Acres Administered by the Bureau of Land Management	7

PART 1

LAND RESOURCES AND INFORMATION

The history of public land management can be divided into three overlapping phases: acquisition, disposal, and conservation. The acquisition phase is the general time period from 1781 through 1867 when the majority of federal lands, known as public lands or the public domain, were acquired. The disposal phase occurred between 1860 and 1935, when a variety of laws were enacted that encouraged the disposal of the public domain. The conservation phase began in 1891 after the Forest Reserve Act became law. In 1934, the Taylor Grazing Act confirmed public land conservation principles and set the stage for many significant land management activities far into the future. Specifically, the law established the basic principles of livestock management on public lands, allowed for land trades for various purposes, and included the requirement that lands be classified before disposal.

Acquisition Phase
The total area of the 50 United States is more than 2.4 billion acres. The first public domain was created in 1781 when New York agreed to relinquish its unsettled territory, which extended westward to the Mississippi River, to the Federal Government. Other colonies followed New York's example, and by 1802, all of the land west of the colonies between the Appalachian Mountains and the Mississippi River belonged to the Federal Government. In the course of national expansion from 1781 to 1867, the public domain rapidly grew beyond the bounds of the Mississippi, with the Federal Government acquiring 1.8 billion acres of public domain lands (Table 1-1).

Disposal Phase
Accurate surveys were needed before the new public lands could be identified for sale or other disposition. In 1785, Congress adopted an ordinance establishing a survey system for the public domain lands. The General Land Office, the predecessor to the present-day Bureau of Land Management (BLM), was established to oversee the surveying and disposal of the public lands. Congress enacted various public land laws to accomplish these disposals while setting aside Indian reservations. The United States sold or granted vast tracts of public lands to settlers, homesteaders, veterans, towns, new states as they entered the Union, railroads, colleges, universities, and private companies to raise money, repay Revolutionary War debts, and encourage settlement of new territories. The land disposals built the country's economic foundation, opened the West to settlement, and united the vast expanses of land into one nation. To date, almost 1.3 billion acres of public lands have been transferred out of Federal Government ownership (Table 1-2).

Conservation Phase
Congress recognized the need to protect the nation's natural, historical, and cultural resources on public lands while also providing opportunities for recreation. Special acts withdrew millions of acres of public lands from settlement for national parks, forests, monuments, wildlife refuges, trails, and wild and scenic rivers. Some of the best known congressional withdrawals include Yellowstone National Park, Grand Canyon National Park, and Death Valley National Park.

The nation's expanding population and mobile society created a demand for a variety of public land uses. Changes in public attitudes and a concern for environmental values and open space began to compete with the need for development and increased production. Congress, recognizing the value of the remaining public domain lands, enacted the Federal Land Policy and Management Act (FLPMA) in 1976. This act declares that "the public lands be retained in Federal ownership, unless as a result of the land use planning procedure provided for in this Act, it is determined that disposal of a particular parcel will serve the national interest." The act also repealed many of the previous disposal laws.

FLPMA mandates that the BLM administer the public lands under the principles of multiple use and sustained yield, while protecting the long-term health of the land. Today, the BLM administers approximately 244.4 million surface acres of public land and approximately 713.3 million acres of federal subsurface mineral estate in the United States. The BLM is responsible for managing these lands and their various resources so that they are used in a manner that will best meet the present and future needs of the nation.

Description of Land Acquisition and Disposal Tables

Table 1-1, Acquisition of the Public Domain, 1781–1867, contains summary data on territories acquired by the Federal Government during the course of national expansion. Thirty states commonly called the "public land states" were created as a result of these acquisitions (Alabama, Alaska, Arizona, Arkansas, California, Colorado, Florida, Idaho, Illinois, Indiana, Iowa, Kansas, Louisiana, Michigan, Minnesota, Mississippi, Missouri, Montana, Nebraska, Nevada, New Mexico, North Dakota, Ohio, Oklahoma, Oregon, South Dakota, Utah, Washington, Wisconsin, and Wyoming).

Table 1-2, Disposition of the Public Domain, 1781–2024, includes summary data and cumulative acreage totals for public lands disposed of by the Federal Government.

Table 1-3, Mineral and Surface Acres Administered by the Bureau of Land Management, contains summary data of mineral estate administration by the BLM and the Bureau of Indian Affairs.

Table 1-4, Changes to Public Lands under Jurisdiction of the Bureau of Land Management, contains a summary of changes to public land acres in each state currently under the administrative jurisdiction of the BLM. This table also includes the amount of BLM-managed surface acres in each state.

Table 1-5, Area of Oregon and California (O&C) Revested Lands, depicts data on revested (Oregon & California Railroad) lands and reconveyed (Coos Bay Wagon Road Company) lands. These lands are administered under the Oregon and California Revested Lands Sustained Yield Management Act of August 28, 1937 (50 Stat. 874), as amended by the act of June 24, 1954 (68 Stat. 271).

Table 1-6, Withdrawals, Revocations, Modifications, Extensions, and Expirations, presents a compilation of withdrawals, revocations, modifications, extensions, and expirations administratively made by the Secretary of the Interior. These withdrawals are for a specific duration that can vary from less than 1 year to as many as 100 years, with a provision for extension if the withdrawal is still needed.

Table 1-7, Cadastral Survey Actions Completed, contains a summary of cadastral surveys completed on federal interest lands managed by the BLM and other agencies during the past year. To manage federal interest lands effectively, the BLM must identify areas both by graphic representation and by monumentation on the ground. This is accomplished by cadastral surveys, an exclusive and significant responsibility of the BLM. Cadastral surveys create and establish on-the-ground boundaries of federal land subdivisions in units suitable for management and for identification in official field notes and plats. This table also summarizes standards for boundary evidence certificates, which are part of the risk-based system of identifying and documenting boundary evidence to determine if the boundary evidence is sufficient for specific land resource transactions.

Table 1-8, Obligations of Appropriations Received, contains a summary of obligations of appropriations made to the BLM during the past fiscal year, as well as a summary of obligations of appropriations transferred from other bureaus and agencies to the BLM. This table summarizes all funds that were obligated to manage the BLM's lands and assist other agencies.

Table 1-1. ACQUISITION OF THE PUBLIC DOMAIN, 1781–1867

	Area			Percentage of Total U.S. Area /a/	Cost /b/
	Land *Acres*	Water *Acres*	Total *Acres*		
State Cessions (1781–1802)	233,415,680	3,409,920	236,825,600	9.7	$6,200,000 /c/
Louisiana Purchase (1803) /d/	523,446,400	6,465,280	529,911,680	21.8	$23,213,568
Red River Basin (1782–1817)	29,066,880	535,040	29,601,920	1.2	$0
Cession from Spain (1819)	43,342,720	2,801,920	46,144,640	1.9	$6,674,057
Oregon Compromise (1846)	180,644,480	2,741,760	183,386,240	7.5	$0
Mexican Cession (1848)	334,479,360	4,201,600	338,680,960	13.9	$16,295,149
Purchase from Texas (1850)	78,842,880	83,840	78,926,720	3.2	$15,496,448
Gadsden Purchase (1853)	18,961,920	26,880	18,988,800	0.8	$10,000,000
Alaska Purchase (1867)	365,333,120	12,909,440	378,242,560	15.6	$7,200,000
Total Public Domain	**1,807,533,440**	**33,175,680**	**1,840,709,120**	**75.6**	**$85,079,222**

/a/ Represents the percentage of total U.S. area, which is 2,429,914,880 acres (3,796,742 square miles), according to U.S. Census Bureau data as of January 1, 2010. This figure excludes U.S. territories and possessions.

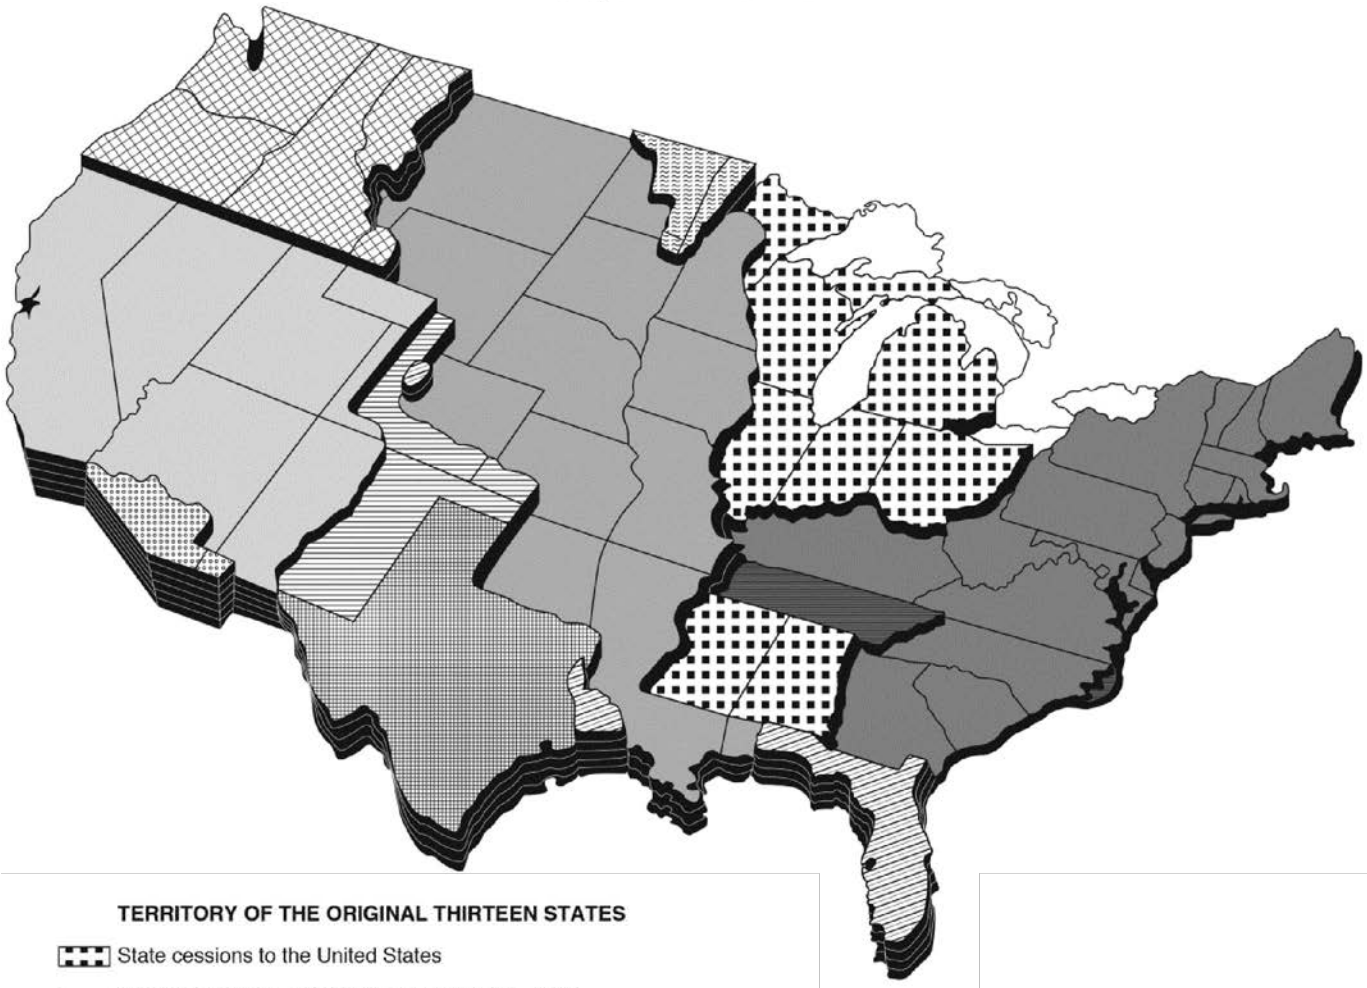
/b/ Cost data for all except "State Cessions" obtained from U.S. Geological Survey, *Boundaries, Areas, Geographic Centers and Altitudes of the United States and the Several States* (Washington, DC, U.S. Government Printing Office, 1939), 249–51.

/c/ See Public Land Commission, *The Public Domain: Its History, with Statistics* (Washington, DC, U.S. Government Printing Office, 1880), 11.

/d/ Excludes areas eliminated by treaty of 1819 with Spain.

Source: U.S. Department of the Interior, Office of the Secretary, Areas of Acquisition to the Territory of the United States (Washington, DC, U.S. Government Printing Office, 1992). Acres therein are based on findings adopted February 2, 1912, by the Secretary of the Interior.

ACQUISITIONS



TERRITORY OF THE ORIGINAL THIRTEEN STATES

State cessions to the United States

North Carolina cession to the United States, 1790
United States cession to Tennessee, 1806 and 1846

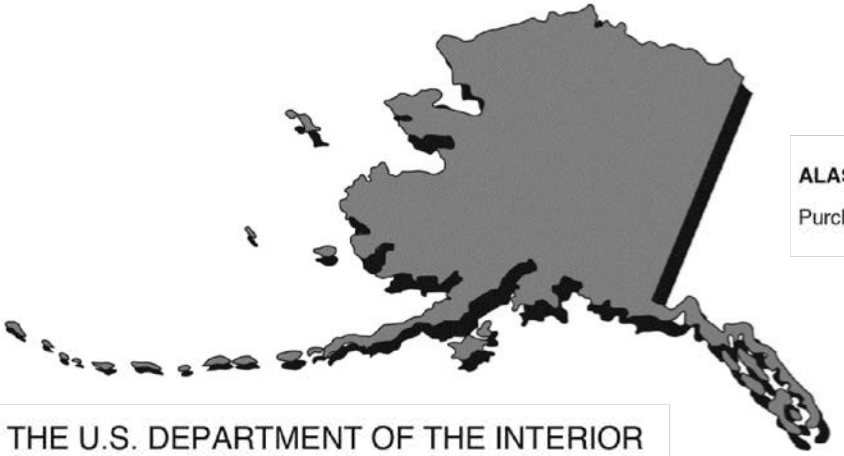
The Original Thirteen States (present area) plus the District of Columbia

TERRITORY OF THE REPUBLIC OF TEXAS
(Annexation of Texas, 1845)

United States purchase from Texas, 1850
State of Texas (present area)

OTHER ACQUISITIONS OF THE UNITED STATES

Louisiana Purchase from France, 1803
Treaties with Great Britain, 1783 and 1817
Treaty with Spain (cession of Florida and adjustment of claims), 1819
Oregon Compromise with Great Britain, 1846
Cession from Mexico, 1848
Gadsden Purchase from Mexico, 1853



ALASKA

Purchased from Russia, March 30, 1867

THE U.S. DEPARTMENT OF THE INTERIOR
BUREAU OF LAND MANAGEMENT

Table 1-2. DISPOSITION OF THE PUBLIC DOMAIN, 1781–2024

Type	Acres
Disposition by methods not classified elsewhere /a/	303,500,000
Granted or sold to homesteaders /b/	287,500,000
Total Unclassified and Homestead Dispositions	**591,000,000**
Granted to states for:	
Support of common schools	77,630,000
Reclamation of swampland	64,920,000
Construction of railroads	37,130,000
Support of miscellaneous institutions /c/	21,700,000
Purposes not classified elsewhere /d/	117,600,000
Canals and rivers	6,100,000
Construction of wagon roads	3,400,000
Total Granted to States	**328,480,000**
Granted to railroad corporations	94,400,000
Granted to veterans as military bounties	61,000,000
Confirmed as private land claims /e/	34,000,000
Sold under timber and stone law /f/	13,900,000
Granted or sold under timber culture law /g/	10,900,000
Sold under desert land law /h/	10,700,000
Total Miscellaneous Dispositions	**224,900,000**
Granted to State of Alaska:	
State conveyances /i/	99,392,526
Native conveyances /j/	44,336,933
Total Granted to State of Alaska	**143,729,459**
Grand Total	**1,288,109,459**

Table 1-2. DISPOSITION OF THE PUBLIC DOMAIN, 1781–2024 –concluded

Note: Data are estimated from available records. The acreage data consist of cumulative totals from the year 1781 to the current fiscal year.

Public land states consist of the States of Alabama, Alaska, Arizona, Arkansas, California, Colorado, Florida, Idaho, Illinois, Indiana, Iowa, Kansas, Louisiana, Michigan, Minnesota, Mississippi, Missouri, Montana, Nebraska, Nevada, New Mexico, North Dakota, Ohio, Oklahoma, Oregon, South Dakota, Utah, Washington, Wisconsin, and Wyoming.

/a/ Chiefly public, private, and preemption sales, but includes mineral entries, scrip locations, and sales of townsites and townlots.

/b/ The homestead laws generally provided for the granting of lands to homesteaders who settled upon and improved vacant agricultural public lands. Payment for the lands was sometimes permitted, or required, under certain conditions. The homestead laws were repealed by the Federal Land Policy and Management Act of October 21, 1976, as amended (Public Law 94-579; 43 U.S.C. 1701).

/c/ Universities, hospitals, asylums, etc.

/d/ For construction of various public improvements (individual items not specified in the granting acts), reclamation of desert lands, construction of water reservoirs, etc.

/e/ The Federal Government has confirmed title to lands claimed under valid grants made by foreign governments prior to the acquisition of the public domain by the United States.

/f/ The timber and stone law provided for the sale of lands valuable for timber or stone and unfit for cultivation.

/g/ The timber culture law provided for the granting of public lands to settlers if they planted and cultivated trees on the lands granted. Payments for the lands were permitted under certain conditions.

/h/ The desert land law provided for the sale of arid agricultural public lands to settlers who irrigated them and brought them under cultivation. Some desert land patents are still being issued (refer to Table 3-1, Patents Issued).

/i/ Alaska Statehood Act of July 7, 1958 (Public Law 85-508; 72 Stat. 339), as amended. Acreage figures fluctuate annually based on survey of previously conveyed acres, new conveyance, corrective documents, title recovery, and regular audits of automated data.

/j/ Alaska Native Claims Settlement Act of December 18, 1971 (43 U.S.C. 1601). Acreage figures fluctuate annually based on survey of previously conveyed acres, new conveyance, corrective documents, title recovery, and regular audits of automated data.

Table 1-3. MINERAL AND SURFACE ACRES ADMINISTERED BY THE BUREAU OF LAND MANAGEMENT, FISCAL YEAR 2024

Table 1-3. MINERAL AND SURFACE ACRES ADMINISTERED BY THE BUREAU OF LAND MANAGEMENT, FISCAL YEAR 2024–concluded

Note: Various databases are used to update this table, including the U.S. Census Bureau TIGER (Topologically Integrated Geographic Encoding and Referencing), BLM SMA (Surface Management Agency), and U.S. Geological Survey PADUS (Protected Areas Database of the United States). Data are intersected with TIGER state boundaries to determine acres for the geographic state, rather than the BLM administrative state. Data from the BLM SMA could fluctuate over the next several years due to continual refinement and state data updates.

/a/ Derived from TIGER state boundaries, which were last updated in 2023.

/b/ The term federal minerals refers to onshore federal minerals that are part of the BLM's responsibilities. The onshore federal mineral acres are the sum of "Federal Surface Lands" acres and "Split Estate Federal Minerals" acres shown in the next two columns.

/c/ Federal surface lands include both the public domain and acquired lands of all federal agencies. Bureau of Indian Affairs (BIA) mineral estate is not included in federal surface lands. The SMA database was used to calculate acres for all states, except PADUS was used for Hawaii.

/d/ The term split estate federal minerals refers to federal mineral rights under private surface lands. These are patented lands with minerals reserved to the United States and may be for single, multiple, or all minerals.

/e/ This column includes BLM-managed surface lands. The SMA database was used to calculate acres for all states, except PADUS was used for Hawaii. All reported acres are rounded. The total reflects the sum of unrounded acres, which is 244,387,084 acres (see Table 1-4). For unrounded acres in each state, including states managed by the BLM Eastern States Office, see Table 1-4.

/f/ As part of its trust management responsibility, the BLM provides technical supervision of mineral development on BIA mineral estate. However, BIA mineral estate is separate and distinct from federal minerals. Acreage information was obtained from the BIA Trust Asset and Accounting Management System in 2024. Reported acres are less than last year's reported acres because FY 2023 data also included fee acres.

/g/ Alaska "BLM Public Lands" and "Federal Surface Lands" include the National Petroleum Reserve-Alaska.

/h/ The BLM Eastern States Office is responsible for federal minerals in the 31 states bordering on or east of the Mississippi River.

Note: Public lands under jurisdiction of the BLM are those lands and interest in lands owned by the United States and administered by the Secretary of the Interior through the BLM, without regard to how the United States acquired ownership, except (1) lands located on the Outer Continental Shelf and (2) lands held for the benefit of American Indians, Aleuts, and Eskimos (Section 103(e) of the Federal Land Policy and Management Act of October 21, 1976, as amended).

The data in this table (except for the last column) are from the BLM Mineral & Land Records System (MLRS). The data in the last column (BLM Public Lands) are from the Surface Management Agency (SMA) database and are the unrounded values of the "BLM Public Lands" data in Table 1-3. The SMA is a geographic information system dataset that provides the best representation of the total acres of public land managed by the BLM. Since the two data sources are not comparable, the net change is not used to determine the acres in the "BLM Public Lands" column.

/a/ Lands obtained by the BLM through purchase, donation, or exchange.

/b/ These lands are within the BLM's jurisdiction. These lands were once withdrawn, modified, or reserved for a specific public purpose by a proclamation, Executive order, Secretarial order, act of Congress, or public land order.

/c/ Total acres added to the BLM's jurisdiction (sum of acquisitions/exchanges/donations and restorations).

/d/ Lands that have been disposed of or sold by the BLM are conveyed under various public land laws or by an act of Congress.

Table 1-4. CHANGES TO PUBLIC LANDS UNDER JURISDICTION OF THE BUREAU OF LAND MANAGEMENT, FISCAL YEAR 2024–concluded

/e/ These lands are withdrawn, modified, or reserved and designated for a specific public purpose by a proclamation, Executive order, Secretarial order, act of Congress, or public land order.

/f/ Total acres removed from the BLM's jurisdiction (sum of disposal/sales and withdrawn/reserved).

/g/ Positive or negative change from FY 2023 to FY 2024 (difference between "Total Increase Acres" and "Total Decrease Acres"). Negative numbers in this column are displayed in parentheses.

/h/ The data in this column are equivalent to the BLM public lands data in Table 1-3. Data for the Eastern States (Alabama, Arkansas, Florida, Illinois, Louisiana, Maryland, Michigan, Minnesota, Mississippi, Missouri, Virginia, and Wisconsin) are from the Eastern States Parcel Identification List. The BLM SMA database was used to calculate acres for all other states.

Table 1-5. AREA OF OREGON AND CALIFORNIA (O&C) REVESTED LANDS, FISCAL YEAR 2024–concluded

/a/ These lands are administered by the BLM. They include O&C timber on nonfederal land on 100 acres in Clackamas County, 160 acres in Columbia County, and 123 acres in Yamhill County.

/b/ Under the provisions of the Converted Lands Act of June 24, 1954 (68 Stat. 271), these lands were declared to be revested O&C railroad grant lands. They were placed under the jurisdiction of the Secretary of Agriculture to be administered with national forest lands, with all revenues derived from such lands to be handled in accordance with the provisions of Title II of the Oregon and California Revested Lands Sustained Yield Management Act of August 28, 1937 (50 Stat. 874), as amended by the act of June 24, 1954 (68 Stat. 271).

/c/ Certain O&C areas were set aside by various acts of Congress to be administered by the U.S. Forest Service without losing their O&C identity. The lands in Benton, Clackamas, Jackson, and Polk Counties are watershed lands, while the land in Josephine County is an administrative site.

/d/ Administered by the BLM; excludes Coos Bay Wagon Road timber on 87 acres of nonfederal land in Coos County.

Oregon	2,897	2,897	2,859	2,859
South Dakota	2,100	2,100	2,100	2,100
Utah	2,565	2,534	2,534	2,534
Washington	2,087	2,087	906	906
Wyoming	2,890	2,675	2,527	2,675
Total	**64,678**	**64,182**	**47,650**	**56,607**

Table 1-7. CADASTRAL SURVEY ACTIONS COMPLETED, FISCAL YEAR 2024–concluded

Note: NA = not applicable

/a/ The accomplishments reported under “Field Accomplishments” are those miles and monuments that were reported during the actual field survey process. Distances to tri-stations are not reportable.

/b/ The accomplishments reported under “Office Accomplishments” are those acres and miles that were reported after the approval of the survey plat and field notes. Distances to tri-stations are not reportable.

/c/ U.S. Forest Service.

/d/ National Park Service.

/e/ Office of Native Hawaiian Relations.

/f/ Department of Defense.

/g/ U.S. Fish and Wildlife Service.

/h/ Protraction diagrams are generally produced for the U.S. Forest Service but may represent unsurveyed land managed by any agency.

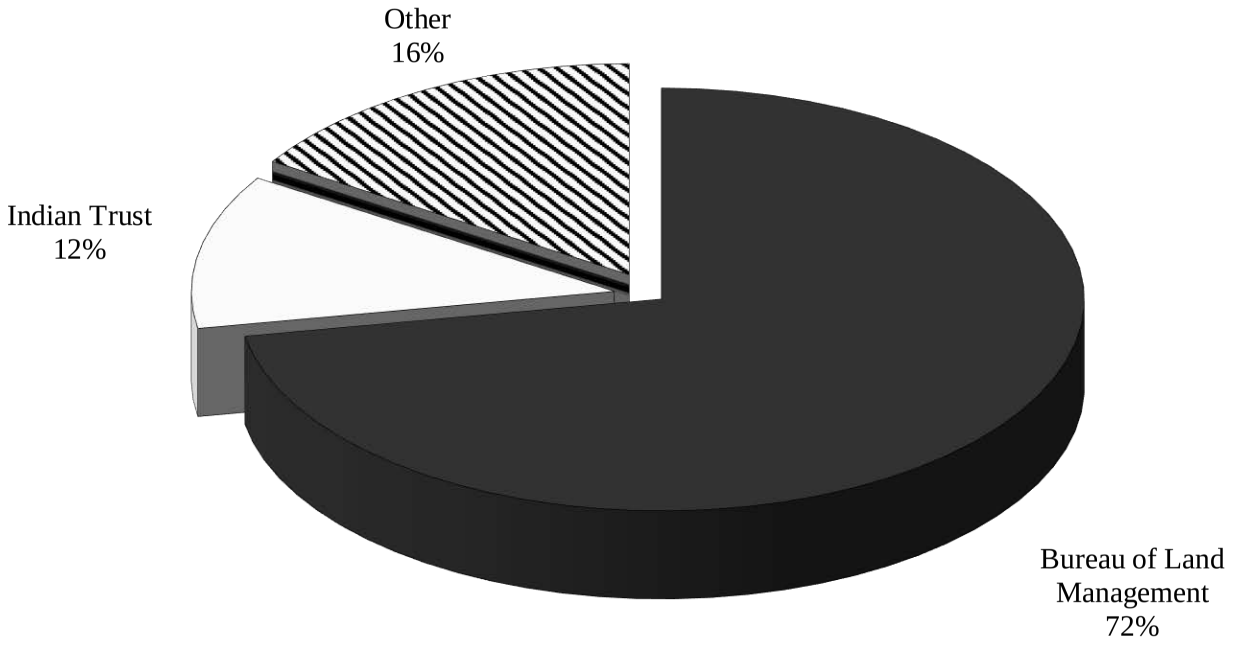
/i/ The data in this table include actions that were accomplished during the fiscal year, except for this category, which shows cumulative data available in the Public Land Survey System Dataset. The Public Land Survey System Dataset results from the computation of coordinates, in latitude and longitude, to corners of the Public Land Survey System and is intended for use in a land or geographic information system, not for boundary determination.

/j/ BLM-collected townships in which coordinate data were collected by BLM staff or under BLM contract.

/k/ “Alternate Source” data pertains to those townships in which the coordinate data were collected by other federal and state government entities. This value is the sum of BLM-collected and alternate source data and represents the number of townships for which data are currently available to the general public to download.

2024 CADASTRAL SURVEY FIELD ACCOMPLISHMENTS

Percentage of Work Performed by Agency



2024 CADASTRAL SURVEY OFFICE ACCOMPLISHMENTS

Percentage of Work Performed by Agency

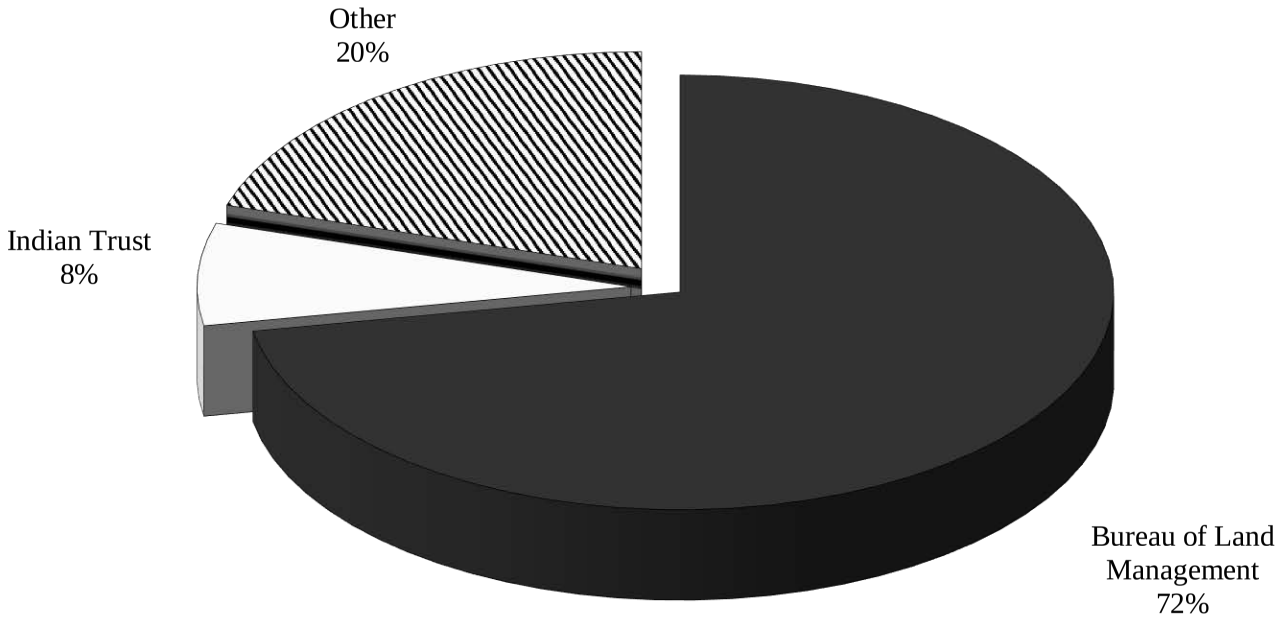


Table 1-8. OBLIGATIONS OF APPROPRIATIONS RECEIVED, FISCAL YEAR 2024

Obligations of Appropriations Made to the Bureau of Land Management

Appropriation Title	Amount Obligated
Management of Lands and Resources	$694,497,128
Southern Nevada Public Land Management Act	$393,733,124
Inflation Reduction Act /a/	$161,769,975
Working Capital	$113,506,834
Oregon and California Grant Lands	$56,815,241
Cost Recovery	$20,103,043
Trust	$14,691,838
Energy Act Funds /b/	$13,831,472
Forest Recovery and Restoration	$12,425,402
Helium	$10,707,297
Recreation and Public Lands Support /c/	$9,147,145
Payments to States	$5,226,732
Range Improvements	$4,902,668
Lincoln County Land Act Land Sales /d/	$1,683,024
Land Acquisition	$859,992
Road Maintenance	$843,426
Stewardship Contract Product Sales	$318,119
Quarters	$284,846
Federal Land Disposal Account	$9,369
Abandoned Well Remediation Fund	$8,342
Total of BLM Appropriations Obligated	**$1,515,365,017**

Obligations of Appropriations Transferred from Other Bureaus and Agencies to the Bureau of Land Management

Appropriation Title	Amount Obligated
Federal Firefighting	$314,906,356
Infrastructure Investment and Jobs Act /e/	$172,127,898
Great American Outdoors Act /f/	$45,512,593
Hazardous Materials	$3,930,255
Natural Resource Damage Assessment	$108,700
Coronavirus Aid, Relief, and Economic Security Act	$0
Total of Transferred Appropriations Obligated	**$536,585,802**
Grand Total of Obligations	**$2,051,950,819**

Table 1-8. OBLIGATIONS OF APPROPRIATIONS RECEIVED, FISCAL YEAR 2024–concluded

/a/ The Inflation Reduction Act (Public Law 117-169) provides funding to support environmental reviews and ecosystem restoration.

/b/ The Energy Policy Act of 2005 (Public Law 109-58) established the Energy Act Funds as follows: Title III, Subtitle F, Section 361, Federal onshore oil and gas leasing and permitting practices; Title III, Subtitle D, Section 331, Transfer of administrative jurisdiction and environmental remediation, Naval Petroleum Reserve Numbered 2, Kern County, California; and Title II, Subtitle B, Geothermal Energy.

/c/ Funded from recreation fees and demonstration site collections to support public lands and recreation. Other recreation obligations are included in "Management of Land and Resources."

/d/ The Lincoln County Land Act (Public Law 106-298) authorizes the gross proceeds of sales of land to be distributed as follows: 5 percent for general education in the State of Nevada and Lincoln County; 10 percent for normal county budgeting procedures, with emphasis given to schools; and 85 percent of collections and the subsequent interest from investment for retention by the BLM and any other participating agencies.

/e/ The Infrastructure Investment and Jobs Act (Public Law 117-58) provides funding to restore ecological health on federal lands and to support wildland fire management operations.

/f/ The Great American Outdoors Act (Public Law 116-152) amends Title 54, United States Code, to establish, fund, and provide for the use of amounts in a National Parks and Public Land Legacy Restoration Fund to address the maintenance backlog of the National Park Service, U.S. Fish and Wildlife Service, Bureau of Land Management, U.S. Forest Service, and Bureau of Indian Education, and to provide permanent, dedicated funding for the Land and Water Conservation Fund, and for other purposes.

PART 2

HEALTHY AND PRODUCTIVE LANDS

In support of the BLM's mission to sustain the health, diversity, and productivity of the public lands for the use and enjoyment of present and future generations, a variety of programs carry out projects in a coordinated manner to support healthy, productive lands. Public lands are healthy and productive when the natural environmental processes that keep them functioning are maintained and self-sustaining. Healthy, productive public lands are a product of careful management in the form of resource conservation, restoration, and use. This requires coordination across programs within the BLM, as well as with partner agencies, nongovernmental organizations, and members of the public.

Table 2-1, Percentage of Rangeland Acreage by Ecological Status by State, provides a summary of the ecological status of BLM-managed rangelands, which is derived from the BLM's national upland monitoring survey. This information is gathered by scientists who visit locations on BLM public land and collect data on vegetation, soil, and water conditions. This information helps land managers determine the capacity of the land for various uses (livestock, grazing, wildlife, recreation, mineral exploration, etc.) and helps assess the status of resource management objectives in land use plans.

Table 2-2, Percentage of Stream and River Miles on BLM-Managed Lands Meeting Desired Condition by Indicator, provides a summary of the percentage of stream and river miles on BLM-managed lands meeting desired conditions for six aquatic metrics in 10 western states. This information is gathered by scientists who visit locations on BLM public land and collect data on biological and physical aspects of lotic ecosystems. This information helps land managers adaptively manage the land for various uses and helps assess the status of resource management objectives in land use plans.

Table 2-3, Resource Conservation and Improvement Accomplishments, provides a quick look at some of the many projects the BLM completed during the past year for conservation, rehabilitation, and development of public lands. These projects stabilize soils, maintain or improve water quality, reduce siltation and salinity, reduce surface runoff, and control flooding. They also assist in improving ecologic site conditions, promoting healthy riparian and wetland areas, and enhancing the overall health of the environment.

Table 2-4, Forest Development Accomplishments in Acres, reports the numerous reforestation and improvement projects that the BLM completed during the past year for restoring forest ecosystems on public lands.

Table 2-5, Types of Wildlife Habitat on Public Lands in the Conterminous 48 States, reports the various types and amounts of wildlife habitats (shrub/scrub, deciduous forest, woody wetlands, open water, etc.) that exist on public lands in the "lower 48" states. These lands offer feeding, roosting, breeding, nesting, and refuge areas for a wide variety of wildlife.

Table 2-6, Types of Wildlife Habitat on Public Lands in Alaska, reports the various types and amounts of wildlife habitats (shrub/scrub, deciduous forest, woody wetlands, open water, etc.) that exist on public lands in Alaska. As with the public lands in the lower 48 states (Table 2-5), these lands in Alaska are important for wildlife.

Table 2-7, Fish, Wildlife, and Plant Conservation Activities Completed, shows projects undertaken to conserve fish, wildlife, and plants on public lands. These conservation efforts are accomplished in cooperation with other federal agencies, state fish and wildlife agencies, conservation groups, and a variety of public and private partners.

Table 2-8, Emergency Fire Stabilization and Rehabilitation Projects, describes the BLM's fire rehabilitation efforts. These projects stabilize soils and restore watersheds after wildfires to protect the environment from erosion and invasive weeds. They also help reduce threats to public health and safety and minimize the potential for the recurrence of wildfire. The number and acreage of fire rehabilitation projects closely follow the amount of wildfires during the past year on public lands.

Table 2-1. PERCENTAGE OF RANGELAND ACREAGE BY ECOLOGICAL STATUS BY STATE, FISCAL YEAR 2024

		Percentage by Ecological Status		
	Acres Inventoried	Intact Native Plant Communities /a/	Infested with Invasive Plants /b/	Healthy Rangelands /c/
Arizona	10,716,137	44.3 ± 10.1	54.9 ± 13.7	51.3 ± 10.8
California	13,947,023	49.4 ± 7.8	48.4 ± 8.5	68.9 ± 38.8
Colorado	7,486,660	80.3 ± 10.1	39.7 ± 12.8	64.3 ± 10.1
Idaho	11,231,170	29.2 ± 5.8	83.9 ± 3.9	75.7 ± 8.4
Montana/Dakotas /d/	7,728,123	67.3 ± 4.7	69.7 ± 7.9	64.2 ± 10.0
Nevada	37,990,947	41.7 ± 6.1	72.5 ± 4.0	60.5 ± 6.2
New Mexico	13,003,280	82.9 ± 9.4	14.4 ± 9.1	55.2 ± 18.0
Oregon	12,194,659	58.1 ± 12.3	60.8 ± 5.2	76.9 ± 11.8
Utah	17,280,154	35.0 ± 11.7	68.3 ± 10.6	20.2 ± 9.5
Washington /e/	346,327	0.0 ± 0.0	100 ± 100	100 ± 100
Wyoming	16,460,286	77.9 ± 7.9	52.7 ± 13.2	67.0 ± 8.8
All BLM Rangeland	**148,384,766**	**53.1 ± 2.8**	**59.4 ± 2.8**	**58.2 ± 3.2**

Note: All estimates are from the BLM National Terrestrial AIM (Assessment, Inventory, and Monitoring) Survey, also known as the BLM Landscape Monitoring Framework. Estimates are representative of the proportion of BLM-managed rangelands sampled in western states. Estimates were generated in FY 2024 from field data collected in FY 2023. Estimates for Alaska are not available due to costs and logistics of field sampling, and data were not collected South Dakota. The ± symbols denote 80% confidence intervals for each estimate. The larger the confidence interval, the greater the uncertainty surrounding that estimate. For example, an estimate of 73.4 ± 9.9 means the most likely value is 73.4, and the range 63.5–83.3 has an 80% chance of containing the true estimate. If a state has a low number of sampling locations for a particular year, it is susceptible to small sample bias and may have large fluctuations in estimates compared to previous years, as well as large confidence intervals. As such, care should be taken to avoid determining trend between consecutive years of data.

/a/ Percent of BLM rangelands where native plants had greater than or equal to 95% relative plant cover.

/b/ Percent of BLM rangelands where nonnative invasive plants had greater than or equal to 1% relative cover.

Table 2-1. PERCENTAGE OF RANGELAND ACREAGE BY ECOLOGICAL STATUS BY STATE, FISCAL YEAR 2024 –concluded

/c/ Percent of BLM rangelands where all three rangeland health attributes (soil and site stability, hydrologic function, and biotic integrity) had a none-to-slight or slight-to-moderate departure from reference conditions. Departure from reference conditions was assessed using the "Interpreting Indicators of Rangeland Health" protocol (Pellant et al. 2020).

/d/ Acres inventoried include both Montana and North Dakota (no acres were sampled in South Dakota). However, due to the low sample size in North Dakota, the ecological status indicators refer only to Montana.

/e/ Monitoring in Washington included very few sampling locations with all sampling locations recording the same values, hence the 80% confidence interval being 100 or 0.

Table 2-2. PERCENTAGE OF STREAM AND RIVER MILES ON BLM-MANAGED LANDS MEETING DESIRED CONDITION BY INDICATOR, FISCAL YEAR 2024

Indicator	Total Stream and River Miles Assessed	Percentage of Stream and River Miles in Desired Condition	Margin of Error (±)
Biologically Intact Aquatic Communities /a/	8,272	77%	4%
Access to Floodplains during High Flow /b/	10,764	70%	4%
Natural Fine Sediment Levels /c/	10,764	81%	3%
Stable and Covered Banks /d/	10,764	61%	4%
No Noxious Herbaceous Species Concerns /e/	7,410	67%	5%
No Invasive Woody Species Concerns /f/	7,410	81%	4%

Note: All estimates are from data collected through the BLM National Lotic AIM (Assessment, Inventory, and Monitoring) effort. Results are representative of the proportion of streams and rivers sampled on public lands managed by the BLM in 10 western states. Estimates were generated in FY 2023 from field data collected in 2019, 2021, and 2022. Data collection occurs for 3 years, the resource is rested for 2 years, and then resampling beings on the 6th year. Total stream miles vary by indicator because of gaps in data associated with sampling, and a change in collection methods for vegetation estimates made one of the two years of data incompatible. Estimates for Alaska are not available at this time due to costs and logistics of field sampling without bias. The ± symbol denotes the margin of error for estimates with 90% confidence. For example, 77% of stream and river miles in desired condition for biologically intact aquatic communities with a 4% margin of error means the most likely value is 77%, and the range 73-81% has a 90% chance of containing the true estimate.

/a/ Percent of stream and river miles on BLM-managed lands where a minimum of 60% (Eastern Xeric Plains ecoregion) or 72% (all other ecoregions) of the expected benthic macroinvertebrate species were present, quantified with an observed/expected (O/E) index. An O/E index compares the macroinvertebrate taxa observed at a sampled site to the assemblages expected to be found at the sampled site in the absence of anthropogenic stressors (Source: Hawkins et al. 2000. Development and evaluation of predictive models for measuring the biological integrity of streams. Ecological Applications 10 (5): 1456–1477).

Table 2-2. PERCENTAGE OF STREAM AND RIVER MILES ON BLM-MANAGED LANDS MEETING DESIRED CONDITION BY INDICATOR, FISCAL YEAR 2024–concluded

/b/ Percent of stream and river miles on BLM-managed lands where streamflows up to 1.5 times bankfull discharge would result in access to at least some portion of the floodplain. Floodplain connectivity is the ratio of average bench height to average bankfull height. Streams with values > 1.5 are considered to lack access to their floodplain and be in degraded condition.

/c/ Percent of stream and river miles on BLM-managed lands where percent fine sediment was within the 90th percentile of reference sites from EPA hybrid Level III ecoregions (Sources: Kaufmann et al. 1999. Quantifying Physical Habitat in Wadeable Streams. EPA/620/R-99/003. U.S. Environmental Protection Agency, Washington, DC; and Stoddard et al. 2005. Environmental Monitoring and Assessment Program (EMAP): Western Streams and Rivers Statistical Summary. EPA 620/R-05/006. U.S. Environmental Protection Agency, Office of Research and Development, Washington, DC.)

/d/ Percent of stream and river miles on BLM-managed lands where > 50% (for Plains, Southern Xeric, and Eastern Xeric ecoregions) or > 60% (for all other ecoregions) of banks were both ≥ 50% covered by vegetation, roots, wood, or cobble and lacking erosional features such as slumps, sloughs, and fractures.

/e/ Percent of stream and river miles on BLM-managed lands where priority noxious herbaceous species were identified at ≤ 25% of the 42 plots measured along the riparian area.

/f/ Percent of stream and river miles on BLM-managed lands where priority invasive woody species were identified at ≤ 25% of the 42 plots measured along the riparian area.

Table 2-3. RESOURCE CONSERVATION AND IMPROVEMENT ACCOMPLISHMENTS, FISCAL YEAR 2024

Fences	Miles	0	0	0	10.14	3.03	28.77	0	6.03	0	0	**47.97**

Note: The sources for these data are the BLM Vegetation Management Action Portal (VMAP) and pesticide use reports. Due to transition from the Rangeland Improvement Project System to VMAP, some data are not represented this fiscal year. Some data are for the fiscal year before the *Public Land Statistics* report fiscal year because projects and treatments started in one fiscal year may not be completed until the next. Data are displayed by administrative state boundaries, which differ from geographic state boundaries. For example, BLM Montana administers BLM public lands in North Dakota and South Dakota, too.

Table 2-4. FOREST DEVELOPMENT ACCOMPLISHMENTS IN ACRES, FISCAL YEAR 2024

Administrative State	Reforestation /a/			Stand Productivity /b/	Genetic Tree Improvement /c/	Stand Improvement /d/			Stand Conversion /e/	Pruning /f/

Table 2-4. FOREST DEVELOPMENT ACCOMPLISHMENTS IN ACRES, FISCAL YEAR 2024 –concluded

Note: The unit of measure for all columns is acres.

/a/ Reforestation is the reestablishment of forest cover, either naturally or artificially.

/b/ Stand productivity is a cultural practice to improve the growth of trees.

/c/ Genetic tree improvement is the use of genetically improved seeds or plants when performing reforestation.

/d/ Stand improvement is an intermediate treatment made to improve the composition, structure, condition, health, and growth of forest or woodland stands. These treatments include release, precommercial thinning, or commercial thinning.

/e/ Stand conversion is a change from one silvicultural system or from one tree species to another.

/f/ Pruning is the cutting of lower branches on trees to improve wood quality or reduce fire hazard.

/g/ Eastern Oregon comprises public lands that include, and extend eastward from, Range 9 East, Willamette Meridian, and all public lands in the State of Washington.

/h/ Western Oregon comprises the revested Oregon and California (O&C) lands, the reconveyed Coos Bay Wagon Road lands, and other public lands that include, and extend westward from, Range 8 East, Willamette Meridian.

Table 2-5. TYPES OF WILDLIFE HABITAT ON PUBLIC LANDS IN THE CONTERMINOUS 48 STATES, FISCAL YEAR 2024

Utah	44,052	19,015	1,487,808	17,285	111,882
Wyoming	24,308	27,567	452,099	9,975	101,497
Total	**269,046**	**186,144**	**6,760,470**	**190,445**	**1,043,319**

Note: This table reflects the broad spectrum of wildlife habitat and the wide variety of associated species present on public lands in the contiguous 48 states. At present, BLM habitat management activities typically focus on management of these habitats in concert with state wildlife agencies and other parties in a way that reflects increased management emphasis on habitat requirements of wildlife species. This table accounts for the relationship between wildlife species and their associated habitat (e.g., grassland wildlife species are generally associated with grassland habitat and plant communities). For the purposes of this table, the term "habitat" represents selected major land cover types (plant communities) reflected in: Dewitz, J., 2023, National Land Cover Database (NLCD) 2021 Products: U.S. Geological Survey data release, https://doi.org/10.5066/P9JZ7AO3. Acres of BLM land are newly derived from Surface Management Agency data (BLM National Operations Center, 2024). Administrative state boundaries are newly derived from BLM administrative unit boundary polygons (BLM National Operations Center, 2024). For BLM administrative states, Montana includes North Dakota and South Dakota; New Mexico includes Kansas, Oklahoma, and Texas; Oregon includes Washington; and Wyoming includes Nebraska. Geographic information system technology was used to determine acres of wildlife habitat on public lands. All reported acres are rounded. Totals reflect the sum of unrounded acres.

Table 2-6. TYPES OF WILDLIFE HABITAT ON PUBLIC LANDS IN ALASKA, FISCAL YEAR 2024

Administrative State	Shrub/ Scrub	Grassland/ Herbaceous	Deciduous Forest	Evergreen Forest	Mixed Forest
	Acres	*Acres*	*Acres*	*Acres*	*Acres*
Alaska	17,889,442	1,346,142	1,806,314	9,199,624	2,020,465

Alaska	4,811	654,106	1,215,781	**69,188,156**

Note: This table reflects the broad spectrum of wildlife habitat and the wide variety of associated species present on public lands in Alaska. At present, BLM habitat management activities typically focus on management of these habitats in concert with the Alaska Department of Fish and Game and other parties in a way that reflects increased management emphasis on habitat requirements of wildlife species. This table accounts for the relationship between wildlife species and their associated habitat (e.g., grassland wildlife species are generally associated with grassland habitat and plant communities). For the purposes of this table, the term "habitat" represents selected major land cover types (plant communities) reflected in the U.S. Geological Survey National Land Cover Database 2016. Acres of BLM land are newly derived from BLM Surface Management Agency data (BLM National Operations Center, 2024). Administrative state boundaries are newly derived from BLM administrative unit boundary polygons (BLM National Operations Center, 2024). Geographic information system technology was used to determine acres of wildlife habitat on public lands. All reported acres are rounded. The total reflects the sum of unrounded acres.

Nevada	44	222,282	56	$9,385,817
New Mexico	1	0	0	$0
Oregon/Washington	53	108,734	47	$10,298,556
Utah	28	0	0	$11,770,882
Wyoming	1	0	0	$30,000
Total	**235**	**706,354**	**167**	**$43,675,245**

/a/ The number of projects equals the number of funded emergency stabilization (ES) and burned area rehabilitation (BAR) projects for a given fiscal year. An area that received both ES and BAR actions is counted as one project to prevent double counting. Base funding was counted as one project for each state.

/b/ Includes the acres of ES and BAR actions implemented, including seeding, soil stabilization (other than seeding), and invasive species inventory and treatment. Note, some actions may occur within the same treatment footprint.

/c/ Activities represent a key workload associated with ES and BAR projects, such as treatment effectiveness monitoring, closures, cultural survey, planning and project management, facility repair, and fence repair. Note, activities are measured as a unit of individual accomplishment; for example, one grazing closure, one monitoring project, 1 mile of fence repair.

/d/ Includes expenditures in FY 2024 for treatments, monitoring, and inventory/assessment; these may include funding for actions approved in prior years, as well as planning costs for FY 2024 fires. Total does not include indirect support, other national program oversight, contracting workforce, national seed storage warehouse, interagency government agreements, and database development costs and burned area emergency response team costs (approximately $5,618,772). The total includes emergency stabilization, regular BAR appropriations, disaster relief funding, and BAR Bipartisan Infrastructure Law funding.

/e/ The acquisition costs for centralized seed purchases tracked through the Fire and Aviation cost center totaled $7,234,034 for FY 2024.

PART 3

COMMERCIAL USES AND REVENUES GENERATED

The demands placed on public lands grow in tandem with the number of people the BLM serves. To meet these demands, the BLM continues to ensure accountability to users of public lands, while emphasizing responsible use.

The BLM continues its longstanding commitment to make land available for authorized private sector activities, such as recreation, energy and mineral commodity extraction, livestock forage use, sawtimber harvest, and other related land use authorizations and land dispositions. The BLM strives to receive a fair return for taxpayers on such transactions, consistent with existing laws. The BLM also strives to protect the public lands from long-term environmental impairment or the creation of unfunded taxpayer liabilities.

The BLM administers approximately 244.4 million surface acres of public land, about one-tenth of the land in the United States, and approximately 713.3 million acres of onshore federal mineral estate located on or underlying both federal surface ownerships and privately owned lands. The BLM provides technical supervision of mineral development and conducts federal authority cadastral surveys on all federal interest lands, including American Indian trust lands.

Tables 3-1 through 3-24 show the essential outputs of various interrelated programs that provide commercial uses. Tables 3-25 through 3-32 display outcome-oriented information in terms of receipts or payments and the allocation of funds generated from commercial use activities on public lands. Table 3-33 presents a financial update of the Southern Nevada Public Land Management Act. Table 3-35 presents information on compliance with diligent development and continued operation of federal coal leases.

Please note that only receipts and payments collected by the BLM are listed. Revenues derived from BLM energy and mineral activities are available at the Department of the Interior's Office of Natural Resources Revenue (ONRR) website. Data from the onshore federal mineral revenues generated by the BLM and collected by the ONRR, including royalties, rents, and bonus bids, and revenue data for Indian mineral owners from mineral operations on American Indian trust lands are not included in this publication.

Table 3-1. PATENTS ISSUED, FISCAL YEAR 2024–concluded

Note: Purchase money includes all revenues collected by the BLM during the fiscal year from all ongoing cases leading to patent; however, this money is not always received in the same fiscal year the patent is issued. Purchase money is not always deposited in the appropriate depository (bank) in the same fiscal year the money is collected. Purchase money enters into the land exchange process because exchanges must result in equal value given and received by both parties; this means that purchase money (equalization payment) is sometimes collected from the proponent or paid by the BLM to ensure an equitable exchange.

/a/ Exchanges pursuant to Section 206 of the Federal Land Policy and Management Act (FLPMA) of 1976 (Public Law 94-579; 43 U.S.C. 1701). See Table 5-8a and Table 5-8b, Land Exchanges and Acquisitions.

/b/ Sales pursuant to the Southern Nevada Public Land Management Act of 1998 (Public Law 105-263; 112 Stat. 2343), as amended.

/c/ Sales pursuant to Section 203 of FLPMA (Public Law 94-579; 90 Stat. 2750; 43 U.S.C. 1713).

/d/ State selections: Issued to the State of Alaska under the Alaska Statehood Act of July 7, 1958 (72 Stat. 339), as amended.

/e/ Tentative approval (TA): Conveyance granting to the State of Alaska legal title to unsurveyed lands and containing all the reservations for easements, rights-of-way, or other interests in land, provided by the Alaska Statehood Act or imposed on the land by applicable law, subject only to confirmation of the boundary descriptions after approval of the survey of the conveyed land.

/f/ Native selections: Issued to Alaska Native corporations under the Alaska Native Claims Settlement Act of December 18, 1971 (43 U.S.C. 1601 et seq.).

/g/ Interim conveyance (IC): Conveyance granting to the recipient legal title to unsurveyed lands and containing all the reservations for easements, rights-of-way, or other interests in land, provided by the Alaska Native Claims Settlement Act or imposed on the land by applicable law, subject only to confirmation of the boundary descriptions after approval of the survey of the conveyed land.

/h/ Alaska Railroad Transfer Act of 1982 (Public Law 97-468; 96 Stat. 2556).

/i/ Certificate of allotment (COA): Document that passes title for Native allotments. These are issued in a restricted status. The BLM issues the COA to the Bureau of Indian Affairs (BIA), which holds the title in trust for the allottee. While the allotment title is held in trust status, the lands are inalienable, meaning that they cannot be seized for debt and are not subject to taxation. They also cannot be sold or encumbered without BIA approval.

/j/ Native allotment certificates issued to individual Natives of Alaska under the act of May 17, 1906 (34 Stat. 197), as amended August 2, 1956 (70 Stat. 954; 43 U.S.C. 270-1 through 270-3).

/k/ Native veteran allotment certificates issued pursuant to the provisions of the Alaska Native Claims Settlement Act (43 U.S.C. 1601 et seq.), as amended; Section 432 of Public Law 105-276 (43 U.S.C. 1629g); Section 301 of Public Law 106-559; the Alaska Native Allotment Act of 1906 (34 Stat. 197), as amended (42 Stat. 415; 70 Stat. 954; 43 U.S.C. 270-1 through 270-3).

Table 3-2. PATENTS ISSUED WITH MINERALS RESERVED TO THE UNITED STATES, THROUGH FISCAL YEAR 2024–concluded

Note: Data before 1949 were tabulated from incomplete records. The data include patents issued on both BLM and U.S. Forest Service lands. See Table 1-3, Mineral and Surface Acres Administered by the Bureau of Land Management, for additional minerals data.

/a/ Minerals began to be reserved with the Coal Lands Act of March 3, 1909. More laws expanding on this act and covering additional minerals were subsequently enacted.

/b/ As of June 30 through 1976; thereafter, as of September 30 each year.

/c/ Does not include 165,712 stockraising homesteads comprising approximately 33,626,607 acres that reserved all minerals to the United States. Some of these homesteads were entered but not patented. The homestead laws were repealed by the Federal Land Policy and Management Act of 1976, as amended (Public Law 94-579; 43 U.S.C. 1701).

Table 3-3. RIGHTS-OF-WAY WORKLOAD, FISCAL YEAR 2024

Table 3-5. NONSPECIFIC PERMITS, LEASES, AND EASEMENTS, FISCAL YEAR 2024–concluded

Note: The title of this table changed from “Nonspecific Land Use Authorizations” to “Nonspecific Permits, Leases, and Easements” to reflect programming within the Mineral & Land Records System (MLRS), which defines land use authorizations to include permits, leases, and easements and rights-of-way authorizations. The new title clarifies that this table does not include rights-of-way.

Authorizations (permits, leases, and easements) in this table occur under 43 CFR 2920, which authorizes uses not specifically authorized under other laws or regulations and not specifically forbidden by law. Residential, agricultural, industrial, and commercial uses may be authorized. Rent collected reflects rental monies received during the fiscal year. As of this reporting year, revenue collected is changed to rent collected to clarify and standardize the monies reported.

Due to the transition to MLRS and an audit, several of the cumulative authorization figures as of September 30, 2023, were adjusted from the cumulative authorization figures published in FY 2023.

/a/ The actual acreage is 0.18 acres. Due to rounding, it is reported as 0.

/a/ Administrative state boundaries differ from geographic state boundaries. For example, BLM California also administers some lands within the State of Nevada, and BLM Montana also administers all BLM public lands in North Dakota and South Dakota. For this reporting year, these are the most accurate data available. The BLM regularly reviews data accuracy, reliability, and completeness between administrative and geographic states and its use with the Rangeland Administration System, which results in updates to available data.

/b/ Active animal unit months (AUMs): AUMs that could be authorized on public lands. These differ from AUM totals shown in the previous tables, which are AUMs authorized for use.

Table 3-9a. GRAZING PERMITS IN FORCE ON GRAZING DISTRICT (SECTION 3) LANDS AS OF JANUARY 7, 2025 –concluded

/c/ Suspended AUMs on public lands are not shown in previous tables because they are not authorized for use.

/d/ An authorization may allow for use in more than one geographic state and is counted once for each respective administrative state.

/a/ This is a count of authorizations, regardless of livestock kind. Some permittees and lessees run more than one kind of livestock and thus may be represented in more than one livestock column. However, they are counted only once in this column.

/b/ These animal unit months were calculated for grazing that occurred during the months covered by billing year 2023 (March 1, 2023, to February 29, 2024).

/c/ Totals do not include authorized nonuse.

Table 3-11. TIMBER, WOOD PRODUCT, AND NONWOOD FOREST PRODUCT SALES, FISCAL YEAR 2024–concluded

Note: This table does not include values associated with the BLM's stewardship contracting authority. Negative values appear in parentheses.

/a/ This includes all original (parent) sawtimber sale values offered during FY 2024. The column includes sales offered using Forms 5450-3, 5450-4, 5450-25, and 5450-26, as well as sawtimber sales using Forms 5450-5 and 5450-24. Also includes Good Neighbor Authority sales of $30.41 in Colorado and $111,030.00 in Wyoming.

/b/ Includes fuelwood, posts, poles, and other wood products.

/c/ Includes Christmas trees, cactus, seeds, yucca, pinyon nuts, mushrooms, yew bark, transplants, and other nonwood forest products or vegetal materials.

/d/ Eastern Oregon comprises public lands that include, and extend eastward from, Range 9 East, Willamette Meridian, and public lands in the State of Washington.

/e/ Western Oregon comprises the revested Oregon and California (O&C) lands, the reconveyed Coos Bay Wagon Road lands, and other public lands that include, and extend westward from, Range 8 East, Willamette Meridian.

Wyoming	12	2,431	$43,824.92	$18.03	23	2,453	5,590	3,436	7,510
Total	**483**	**235,789**	**$56,895,416.44**	**$241.30**	**1,077**	**236,866**	**97,266**	**4,488**	**337**

Table 3-12. FOREST PRODUCTS OFFERED BY STATE, FISCAL YEAR 2024–concluded

Note: Some numbers may be slightly off due to rounding. Negative values appear in parentheses.

1 MBF = 1,000 board feet; 1 board foot measures 1 foot in length by 1 foot in width by 1 inch in thickness. All sawtimber volumes listed are in MBF units; however, the contracts may have been offered as MBF, 100 cubic feet units (CCF), or tons, based on local market trends, and have been converted to MBF for this table. Conversion factors used were 1 MBF = 1.6 CCF = 6 tons.

/a/ This includes all original (parent) sawtimber sale volumes offered and modifications to volume under contract during FY 2024. The column includes sales offered using Forms 5450-3, 5450-4, 5450-25, and 5450-26, as well as sawtimber sales using Forms 5450-5 and 5450-24. Values do not include biomass offered through timber sales. The following state did not sell its entire volume offered (actual volume sold is in parentheses): Idaho (2,905 MBF).

/b/ The purpose of the average price per MBF is to provide an idea of market values for the year. Values from negative modifications are not used in this calculation. If the values from negative modifications from the previous year's sales were included, the resultant average price per MBF would present an inaccurate measure of market prices for the current year. These values cannot be derived mathematically from the table data presented.

/c/ Includes posts, poles, and other special forest products (SFPs), as well as all free use that can convert to MBF.

/d/ This column adds "Sawtimber Offered" and "Other SFP," converted to one common measure (MBF).

/e/ This column includes both biomass and fuelwood sales converted into GTON (green tons). One cord of fuelwood is equal to 1.7 GTON of biomass. Biomass includes the limbs, tops, needles, leaves, and other woody parts of trees and woody plants grown in a forest, woodland, or rangeland environment. Volumes associated with the BLM's stewardship contracting are not included in this column.

/f/ Special authorities list volumes for forest product sales using Stewardship Contracting Authority or Good Neighbor Authority (GNA). In FY 2024, California had 1,110 MBF and 1,149 GTON under Stewardship Contracting Authority. Colorado had 14 MBF and (3,271.4) GTON under GNA. Montana had (72) MBF and (4,147) GTON under Stewardship Contracting Authority. Wyoming had 3,436 MBF under GNA and 7,510 GTON under Stewardship Contracting Authority.

/g/ Eastern Oregon comprises public lands that include, and extend eastward from, Range 9 East, Willamette Meridian, and public lands in the State of Washington.

/h/ Western Oregon comprises the revested Oregon and California (O&C) lands, the reconveyed Coos Bay Wagon Road lands, and other public lands that include, and extend westward from, Range 8 East, Willamette Meridian.

Grand Total of All Competitive Oil, Gas, and Geothermal Leases	**16,108**	**12,785,996**	**238**	**206,937**	**$183,560,930**

Note: The three righthand columns of this table do not apply to leases authorized before the Federal Onshore Oil and Gas Leasing Reform Act of 1987 (Reform Act), except for those leases that had been pending issuance owing to litigation or appeal.

The data for this table come from the automated Mineral & Land Records System (MLRS). The MLRS is a dynamic system that is frequently updated.

/a/ Leases that are authorized as of the last day of the fiscal year. Includes leasing actions during the fiscal year, as shown in the three righthand columns of this table.

/b/ Leases issued before the Reform Act.

/c/ This is the total of all pre-Reform Act leases and pre-Reform Act future interest leases.

/d/ Leases issued under the Reform Act.

/e/ This is the total of all Reform Act leases and Reform Act future interest leases.

/f/ Leases issued under the Inflation Reduction Act.

/g/ This is the total of all Inflation Reduction Act leases.

Table 3-13. COMPETITIVE OIL, GAS, AND GEOTHERMAL LEASING, FISCAL YEAR 2024–concluded

/h/ Leases issued under the Mineral Leasing Act of 1920 for lands previously withdrawn or reserved from the public domain that are no longer needed by the agency for which the lands were withdrawn or reserved and that have been declared excess or surplus by the General Services Administration.

/i/ Leases issued in accordance with the provisions of the Attorney General Opinion of April 2, 1941 (i.e., these leases must have the consent of the jurisdictional agency, must have drainage of oil and/or gas wells located on adjacent lands, and must not be subject to leasing under any leasing act).

/j/ Leases issued under the Interior Appropriations Act, FY 1981, for lands within the National Petroleum Reserve-Alaska.

/k/ Leases issued under the Defense Authorization Act, FY 1998, for lands within Oil Shale Reserve Numbers 1 and 3.

/l/ This is the grand total of all pre-Reform Act leases, Reform Act leases, Inflation Reduction Act leases, and all other competitive oil and gas leases; however, it does not include competitive geothermal leases.

/m/ Leases issued under the Geothermal Steam Act.

/n/ Leases issued under the Geothermal Steam Act, as amended by the Energy Policy Act of 2005.

Table 3-15. OTHER OIL, GAS, AND GEOTHERMAL LEASING ACTIONS, FISCAL YEAR 2024–concluded

Note: The data for this table come from the automated Mineral & Land Records System (MLRS). The MLRS is a dynamic system that is frequently updated.

/a/ Leases that are authorized as of the last day of the fiscal year. Includes leasing actions during the fiscal year, as shown in the two righthand columns of this table.

/b/ An existing oil and gas lease, between private parties, now managed by the Federal Government when the mineral estate was purchased as part of a Federal Government land acquisition.

/c/ A lease issued before August 8, 1946, for a term of 20 years, or renewal thereof; or a lease that was issued in exchange for a 20-year lease.

/d/ A lease issued for a term of 20 years, or any renewal thereof; or renewed for a new 20-year lease.

/e/ A lease arising from an abandoned placer mining claim reinstated under the provision of Class III of the Federal Oil and Gas Royalty Management Act of 1982 and concurrently converted to an oil and gas lease.

/f/ A lease issued under the act of May 21, 1930, which authorizes the leasing of oil and gas deposits under certain rights-of-way to the owner of the right-of-way or any assignee thereof.

/g/ A lease issued on lands acquired by the Federal Farm Mortgage Corporation (FFMC) under the FFMC Act of 1934.

/h/ A lease issued under the Relinquishment Act of 1919.

/i/ This is the total of all other oil and gas leases; it does not include other geothermal leases.

/j/ An existing geothermal lease, between private parties, now managed by the Federal Government when the mineral estate was purchased as part of a Federal Government land acquisition.

Table 3-17. CONTINUING OIL, GAS, AND GEOTHERMAL ACTIVITIES ON FEDERAL LANDS AS OF SEPTEMBER 30, 2024–concluded

/a/ Data come from the Mineral & Land Records System (MLRS). Since FY 2009, the BLM has recategorized data collected for the last two columns of this table. Before FY 2009, the displayed data was categorized as "producible leases," which included leases with the status of (1) held by actual production, (2) held by allocated production, and (3) held by being located in a producing unit. Since FY 2009, the BLM has been reporting the data as "producing leases." This includes leases with the status of (1) held by actual production and (2) held by allocated production. This categorization conforms data reported by the BLM and the Office of Natural Resources Revenue for producing leases.

/b/ Service holes and completions are not necessarily located on producible leases. The oil and gas data come from the Automated Fluid Minerals Support System (AFMSS). This reflects the best available FY 2024 permit and well data from AFMSS, supplemented by state and field office updates and verifications.

/c/ The geothermal data come from state and field office records.

Table 3-18. FEDERAL COAL LEASES, LICENSES, PREFERENCE RIGHT LEASE APPLICATIONS, AND LOGICAL MINING UNITS, FISCAL YEAR 2024–concluded

Note: Data for federal coal lease diligent development and continued operation are shown in Table 3-35.

NA = not applicable.

/a/ Authorized leases and licenses are shown, along with those logical mining units (LMUs) that were authorized as of September 30, 2024. Totals include actions during the fiscal year, as shown in the three righthand columns. These columns provide the net number of new leases, licenses, and permits authorized and LMU actions approved with an effective date during the fiscal year. Actions approved during the fiscal year that reduced the quantity or acreage of leases, licenses, or LMUs are shown in parentheses. Pending preference right lease applications are also shown. Acreage totals may differ slightly from other data sources because of the rounding methods used.

/b/ Values reflect the termination, cancellation, expiration, or relinquishment of all or part of a lease, license, preference right lease application, or LMU that was completed during the fiscal year. A termination, cancellation, expiration, or full relinquishment is reflected by a decrease in the lease, license, or LMU acreage and quantity. A partial relinquishment is reflected by a decrease in only the lease, license, or LMU acreage.

/c/ Values reflect differences in the Legacy Rehost System (LR2000) data that were discovered while transitioning to the Mineral & Land Records System.

Note: NA = not applicable.

/a/ The first two columns of this table include authorized leases, licenses, and permits and pending preference right lease applications. The last three columns include new actions during the fiscal year. New actions that increase numbers and acreage, such as new leases, licenses, and permits, are shown without parentheses. New actions that decrease numbers and acreage, such as lease, license, or permit terminations, expirations, or relinquishments, are in parentheses, and the totals are a sum of the increases and decreases.

/b/ A lease modification(s) was issued, which increased the acreage of an existing lease(s).

/c/ These mineral leases were acquired from the State of Utah. They were issued under the rules of the State of Utah, so they do not have standard federal lease terms.

/d/ The research, development, and demonstration (RD&D) oil shale leases have terms and conditions that, if met, may allow them a preference to additional identified lands for commercial development.

/e/ "Hardrock" refers to minerals that are locatable under the 1872 Mining Law when they occur on public domain lands. These minerals are, however, leasable if they occur on acquired federal land or within the national forests in Minnesota. These minerals include copper, nickel, lead, zinc, cadmium, cobalt, gold, silver, garnet, uncommon-variety limestone or clay, platinum, palladium, quartz crystals, semiprecious gemstones, uranium, or other minerals.

Note: Materials were disposed of under the Materials Act of 1947 (61 Stat. 681; 30 U.S.C. 601), as amended by the Multiple Use Mining Act of 1955 (69 Stat. 367). Due to a database transition, some irregularities occurred in reporting for states, such as New Mexico sales/use permits.

/a/ The data are aggregated into eight standard material groups.

/b/ New disposals this year showing the total quantity and value over the full term of the authorization.

/c/ Reports show quantity and dollar values of production this year from all new and previously issued sale contracts and permits.

/d/ Includes sales and permit data originally reported in both tons and cubic yards. For this table, all data have been converted automatically to cubic yards.

/e/ Includes North Dakota and South Dakota.

/f/ Includes Kansas, Oklahoma, and Texas.

/g/ Includes Washington.

/h/ Includes Nebraska.

Sources: The Mineral & Land Records System and the Alaska Land Information System automated databases.

Table 3-21. MINERAL PATENTS ISSUED, FISCAL YEAR 2024

/a/ Totals reflect the total numbers of claims ever recorded by the Bureau of Land Management, since passage of the Federal Land Policy and Management Act of October 21, 1976. This number does not represent the number of active claims that remain in good standing.

/b/ Active means that the subject claim or site is in good standing under the recording, annual maintenance, and assessment work statutes. It does not refer to any potential activity on the land contained within the claim or site.

Table 3-22. ADJUDICATION OF MINING CLAIMS, PUBLIC LAW 94-579, FROM OCTOBER 21, 1976, THROUGH FISCAL YEAR 2024–concluded

/c/ Represents actions taken during the fiscal year to close case files. Cases are closed when a patent is issued for the mining claim or site, the claim is relinquished, or the claim is declared abandoned and void, or null and void, pursuant to 43 CFR Parts 3830, 3833, 3834, or 3835. Cases closed during any one fiscal year also include claims or sites that were considered void in previous years but that were not actually adjudicated until the present fiscal year.

/d/ Mining claims or sites held under the first half of the mineral entry final certificate (FHFC) for a mineral patent application.

/e/ The amounts of active claims and their respective acreages are derived from the summation of those mining claims and sites that are held under FHFC, those for which the required annual maintenance fee payment was made, and those that are held under a waiver from the payment of the annual maintenance fees. The amounts and acreages cannot be derived mathematically from the table data presented, as these totals can change daily.

/f/ Includes all states bordering on or east of the Mississippi River.

/g/ Includes Montana, North Dakota, and South Dakota.

/h/ Includes New Mexico, Kansas, Oklahoma, and Texas.

/i/ Includes Oregon and Washington.

/j/ Includes Wyoming and Nebraska.

Table 3-23. NOTICES AND PLANS OF MINING OPERATIONS REVIEWED BY THE BUREAU OF LAND MANAGEMENT, FISCAL YEARS 2017 THROUGH 2024–concluded

/a/ Notices, including amendments, extensions, and modifications to existing notices, reviewed by the BLM for operations causing a cumulative surface disturbance of less than 5 acres per calendar year (43 CFR 3809.301).

/b/ Includes Montana, North Dakota, and South Dakota.

/c/ Includes New Mexico, Kansas, Oklahoma, and Texas.

/d/ Includes Oregon and Washington.

/e/ Includes Wyoming and Nebraska.

/f/ Plans reviewed by the BLM for operations under wilderness review (43 CFR 3802.1-1); plans reviewed, including modifications and amendments to existing plans, for areas of public lands where the cumulative surface disturbance will exceed 5 acres per calendar year (43 CFR 3809.401 and 3809.430); and plans reviewed for Stockraising Homestead Act lands under 43 CFR 3809.31.

Table 3-24. HELIUM OPERATIONS AND REVENUES, FISCAL YEARS 2020 THROUGH 2024

	Federal Helium		Storage and Transmission of Private Helium		Helium Produced from Public Land		Natural Gas/ Liquids Sales	
Fiscal Year	Volume Sold	Sales Receipts /a/	Volume in Storage /b/	Operations Receipts /c/	Volume Sold /d/	Fee Sales and Royalty Receipts /e/	Volume Sold	Sales Receipts /f/
2020	160	$15,560	2,249	$12,301	1,629	$23,000	2,299	$2,690
2021	212	$20,987	2,188	$9,359	1,615	$24,240	2,042	$8,147
2022	192	$14,648	2,066	$5,334	1,414	$31,973	1,649	$7,869
2023	0	$12,903	1,491	$15,820	1,334	$39,119	3,751	$6,986
2024	199	$1,311	1,179	$8,190	2,653	$47,483	2,964	$2,634

Note: All receipts are in thousands of dollars; all helium volumes are in million cubic feet (14.65 pounds-force per square inch absolute [psia] and 60 degrees F); all natural gas/liquids volumes are in thousand decatherms (14.73 psia and 60 degrees F). BLM operating expenses for the Federal Helium Program are deducted from revenues. All operations are financed through the revolving Helium Production Fund.

/a/ Open market sales ended in 2018. Figures represent in-kind sales only. Sales of in-kind helium from the Federal Reserve ended in 2022. Residual revenue from previous sales was received after publication of the 2023 report and is now listed. In July 2024, government-owned helium and helium-related plant and pipeline assets were sold to private concern as instructed by the Helium Privatization Act.

/b/ This is the balance of private helium remaining in storage at the end of each fiscal year. Government helium in storage was sold in July 2024. See /a/.

/c/ The storage contracts provide for the collections of contract fees, pipeline connection fees, and reservoir management fees based on stored volumes and the storage activity conducted by the contract holder. See /a/

/d/ Volumes reported are based on helium contained in gross gas handled and represent only estimates of the volumes of helium sold from federal land.

/e/ Includes revenues for federal helium produced in Colorado, Kansas, New Mexico, Oklahoma, Texas, Utah, and Wyoming. Volumes reported do not correlate directly to revenues. Revenues are based on value received and volume of helium extracted.

/f/ Figures represent sales of natural gas plus natural gas liquids.

Sources: Helium operations statistical report, BLM Collections and Billings System, BLM Financial and Business Management System, and BLM Management Information System.

Table 3-25. RECEIPTS FROM THE DISPOSITION OF PUBLIC LANDS AND RESOURCES, FROM MAY 28, 1785, THROUGH FISCAL YEAR 2024–concluded

Note: This table includes the collections of the BLM and its two predecessor organizations: the General Land Office (1785–1946) and the Grazing Service (1934–1946). For annual data from 1881–1946, see the *General Land Office Statistical Appendix* for 1946. For annual data from 1947–1961, see the *BLM Statistical Appendix* for 1961. For annual data from 1961–1970, 1971–1980, 1981–1990, 1991–2000, 2001–2010, and 2011–2020, see the BLM *Public Land Statistics* for 1970, 1980, 1990, 2000, 2010, and 2020, respectively.

/a/ As of June 30 through 1976; thereafter, as of September 30.

/b/ The Mineral Leasing Act of February 25, 1920 (41 Stat. 437; 30 U.S.C. 181 et seq.). Collection and distribution responsibilities for receipts under the Mineral Leasing Act were transferred to the Minerals Management Service (MMS) on October 1, 1983. Collection and distribution responsibilities for receipts from the National Petroleum Reserve-Alaska and for royalties from the south half of the Red River in Oklahoma were transferred to the MMS on October 1, 2007. The BLM has continued to collect oil and gas pipeline rights-of-way rents and rents, bonuses, and royalties from Bankhead-Jones land utilization project lands. Other mineral and oil and gas receipts are collected and reported by the Office of Natural Resources Revenue, which performs revenue management functions formerly performed by the MMS. This column includes Outer Continental Shelf leases before their transfer to the MMS, which was effective May 10, 1982.

/c/ Before 1880, includes all receipts from the sale or lease of public lands and resources. After 1880, includes sales of Indian lands, revenues from grazing, rent of land, and other sources.

/d/ Naval Oil Shale Reserve (NOSR) receipts under the Mineral Leasing Act were included in BLM collections beginning in FY 1999. The BLM is authorized to keep these receipts under the 1998 National Defense Authorization Act and to seek appropriation of these funds for environmental restoration of the NOSR 1 and 3 properties, which were transferred to the BLM in 1998.

/e/ Includes Southern Nevada Public Land Management Act collections of $816,373,632 from FY 2011 to FY 2020, $109,110,131 in FY 2021, $473,729,512 in FY 2022, $182,623,123 in FY 2023, and $163,452,305 in FY 2024.

/f/ Includes “application for permit to drill” collections of $363,319,454 from FY 2011 to FY 2020, $53,924,160 in FY 2021, $40,574,760 in FY 2022, $51,510,130 in FY 2023, and $56,854,980 in FY 2024.

Percent	0.03%	14.03%	0.12%	8.63%	0.37%	100%
Mining Claim and Holding Fees /c/						$100,840,353
Application for Permit to Drill Fees						$56,854,980
Non-Operating Revenue /d/						$155,218,285
Grand Total	**$103,958**	**$51,706,432**	**$440,364**	**$31,802,095**	**$1,355,812**	**$681,552,619**

/a/ Includes bonus bids and first year rentals. All subsequent rents and royalties are collected by the Office of Natural Resources Revenue (ONRR), which performs revenue management functions formerly performed by the Minerals Management Service (MMS). Information on revenue collected by the ONRR may be found on the ONRR website at https://www.onrr.gov/.

/b/ Includes Southern Nevada Public Land Management Act (SNPLMA) collections of $163,452,305.

/c/ Includes mining claim collections of $2,184,125 and mining claim holding fee collections of $98,656,228.

/d/ Includes receipts from fines, penalties, forfeitures, recovery fees, and road maintenance of $66,412,247; interest received from delinquent debt of $25,807; interest from investments under SNPLMA of $87,295,127; and interest from the Lincoln County Land Act of $1,485,104.

/e/ Includes land utilization project lands purchased by the Federal Government under Title III of the Bankhead-Jones Farm Tenant Act (7 U.S.C. 1012) and subsequently transferred to the Department of the Interior. Bankhead-Jones Farm Tenant Act receipts from livestock grazing and other resources totaled $1,641,149.

/f/ Includes Oregon & California receipts of $54,887,905, Coos Bay Wagon Road receipts of $4,263,930, and receipts from public domain sales and other categories of $6,808,783.

Table 3-27. RECEIPTS FROM OIL AND GAS RIGHT-OF-WAY RENTALS, RENTS, BONUSES, AND ROYALTIES, FISCAL YEAR 2024

	Oil and Gas Pipeline Right-of-Way Rentals	Oil and Gas Rents, Bonuses, and Royalties	Total

Total	**$30,180,231**	**$6,331,514**	**$1,286,556**	**$890,597**	**$26,355,239**	**$65,044,137**

Table 3-28. ALLOCATION OF RECEIPTS TO STATES AND LOCAL GOVERNMENTS BY PROGRAM, FISCAL YEAR 2024–concluded

Note: This table and Table 3-29 show how receipts for FY 2024 have been allocated. These amounts were paid in FY 2025 except for oil and gas pipeline rights-of-way, which are paid the month after receipt. The payments are reduced for sequestration by 5.7 percent, where required by Section 251A of the Budget Control Act of 2011 (Public Law 112-25).

/a/ Land utilization, land grazing, and the sale of other resources under the Bankhead-Jones Farm Tenant Act (7 U.S.C. 1012) and Executive Order 10787.

/b/ There were no Clark County land sales in FY 2024 under the Santini-Burton Act of December 23, 1980. Allocation from the Southern Nevada Public Land Management Act of October 19, 1998, amounted to $30,596,746, which includes direct payments at the time of sale by the purchaser to state and local governments. For FY 2024, allocations to Lincoln County amounted to $16,050 under the Lincoln County Conservation, Recreation, and Development Act of 2004. The remainder of the allocation is from sales of public domain lands and materials.

/c/ FY 2024 payment issued for 50 percent of receipts for Oregon and California (O&C) grant lands is $25,879,647, under Title II of the Oregon and California Lands Act of 1937 (43 U.S.C. 1181f; 50 Stat. 874, Title II). FY 2024 payments for Coos Bay Wagon Road (CBWR) grant lands is $341,034, under the Coos Bay Wagon Road Act of 1939 (43 U.S.C. 1181f-1; 53 Stat. 753).

Table 3-29. ALLOCATION OF RECEIPTS BY SOURCE AND FUND, FISCAL YEAR 2024

Source of Receipts	Reclamation Fund	BLM Funds /a/	States and Counties /b/	U.S. Treasury General Fund and Other Funds /c/	Total

Other /h/	$0	$0	$0	$818,631	$818,631
Total	**$26,984,560**	**$495,561,466**	**$65,044,137**	**$93,962,456**	**$681,552,619**

Table 3-29. ALLOCATION OF RECEIPTS BY SOURCE AND FUND, FISCAL YEAR 2024 –concluded

Note: This table and Table 3-28 show how receipts for FY 2024 have been allocated; these amounts were paid in FY 2025, with the exception of Mineral Leasing Act rights-of-way, which are paid monthly in the year of receipt.

/a/ BLM funds include range improvement, forest ecosystem health and recovery, cost recovery, and management of land and resources (e.g., communication site rent, recreation fees, and mining claim/mining claim holding fees).

/b/ Compare with Table 3-28, Allocation of Receipts to States and Local Governments by Program.

/c/ Includes amounts withheld for sequestration under Section 251A of the Budget Control Act of 2011 (Public Law 112-25).

/d/ Includes $1,641,149 from Bankhead-Jones Farm Tenant Act (7 U.S.C. 1012) lands and $12,051,540 from other lands.

/e/ Excludes Southern Nevada Public Land Management Act receipts, which are shown separately in this table.

/f/ Payments made under Title II of the Oregon and California Lands Act of 1937 (43 U.S.C. 1181f; 50 Stat. 874, Title II).

/g/ Payments made under the Coos Bay Wagon Road Act of 1939 (43 U.S.C. 1181f-1; 53 Stat. 753).

/h/ Excludes Oregon and California (O&C) and Coos Bay Wagon Road (CBWR) receipts, which are shown separately in this table.

/i/ Includes “rent of land” and receipts from Bankhead-Jones Farm Tenant Act (7 U.S.C. 1012) lands; excludes rights-of-way rent, as well as mineral leases and permits.

/j/ Non-operating revenue includes receipts from fines, penalties, service charges, recovery fees, and interest.

Table 3-30. PAYMENTS TO STATES (INCLUDING LOCAL GOVERNMENTS) AND TERRITORIES, FISCAL YEAR 2024

	Mineral Leasing Act /a/	TAYLOR GRAZING ACT			Proceeds of Sales	Other	Total Payments
		Sec. 15	Sec. 3	Other

Table 3-30. PAYMENTS TO STATES (INCLUDING LOCAL GOVERNMENTS) AND TERRITORIES, FISCAL YEAR 2024–concluded

Note: This table is based on amounts actually paid in FY 2024. By contrast, Table 3-28, Allocation of Receipts to States and Local Governments by Program, and Table 3-29, Allocation of Receipts by Source and Fund, show how receipts for FY 2024 (October 2023 through September 2024) have been allocated; those amounts were paid in FY 2025.

/a/ Sequester amounts of 5.7 percent were withheld for Mineral Leasing Act payments per Section 251A of the Budget Control Act of 2011 (Public Law 112-25).

/b/ Land utilization lands under the Bankhead-Jones Farm Tenant Act (7 U.S.C. 1012).

/c/ Land sales under the Southern Nevada Public Land Management Act resulted in direct payments at the time of sale, totaling $27,634,519. Calendar year payments to Clark County, Nevada, and the State of Nevada under the Santini-Burton Act totaled $0.

/d/ Payments for Oregon and California (O&C) grant land and Coos Bay Wagon Road (CBWR) grant land counties.

Table 3-31. LEGAL ALLOCATION OF BUREAU OF LAND MANAGEMENT RECEIPTS, FISCAL YEAR 2024–continued

Note: Collection and distribution responsibilities for receipts under the Mineral Leasing Act of 1920 (41 Stat. 437; 30 U.S.C. 181 et seq.) were transferred to the Minerals Management Service (MMS), predecessor of the Office of Natural Resources Revenue (ONRR), as of October 1, 1983. The BLM distributes receipts from oil and gas pipeline rentals under the Mineral Leasing Act.

/a/ Payments to Oregon and California (O&C) counties and Coos Bay Wagon Road (CBWR) grant lands are authorized under the acts of August 28, 1937 (50 Stat. 874) and May 24, 1939 (53 Stat. 753, ch. 144), as amended by the Oregon and California Land Grant Act of 2014 and related statutes (e.g., 43 U.S.C. 1736a; Public Law 104-134; Public Law 105-321; Public Law 106-248; Public Law 110-28; Public Law 106-393, as amended by Public Law 110-343; Solicitor's Opinion, Jan. 28, 1998). For O&C counties, 50 percent of receipts from timber salvage and pipeline restoration commodities is directed to Forest Recovery/Restoration and 50 percent to counties; for CBWR lands, 25 percent is directed to Forest Recovery/Restoration and 75 percent to counties. For all other commodities, O&C receipts are split—50 percent to the General Fund and 50 percent to counties; for CBWR, 25 percent goes to the General Fund and 75 percent is used to fund payments to counties. CBWR payments are based on tax equivalency and are funded from 75 percent of gross receipts; unspent funds are held for 10 years, after which any remaining balance is transferred to the General Fund (43 U.S.C. 2621 et seq.).

/b/ Distributed by the agency having jurisdiction over the lands in the same manner as prescribed for other receipts from the same lands.

/c/ Includes revenues from reclamation lands outside reclamation projects per the cooperative agreement of March 8, 1972.

/d/ Payment to states represents 5 percent of net receipts (which equals 4 percent of gross receipts).

/e/ Authority for the Federal Land Transaction Facilitation Act was reauthorized under the Consolidated Appropriations Act, 2018, Division O, Title III, Sections 301 and 302.

/f/ Distribution is the same as shown for land utilization lands mineral leases and permits.

/g/ Payment to the Reclamation fund is made after deducting sale costs or 10 percent of revenue, whichever is less, to reimburse the BLM for sale expenses.

/h/ The Bureau of Reclamation may pay sale costs from the Reclamation fund, or expenses may be paid and deducted by the BLM before transfer to the Reclamation fund.

/i/ The Southern Nevada Public Land Management Act (SNPLMA) authorizes the orderly disposal of certain federal lands through sale in Clark County, Nevada, and provides for the acquisition of environmentally sensitive lands within the State of Nevada and other specified purposes. SNPLMA includes the authority for the Secretary of the Interior to invest receipts (85 percent) in U.S. Treasury securities.

Table 3-31. LEGAL ALLOCATION OF BUREAU OF LAND MANAGEMENT RECEIPTS, FISCAL YEAR 2024–concluded

/j/ One hundred percent of the grazing fees that are deposited to receipt account 5132, grazing fees for range improvements (Taylor Grazing Act, as amended), are appropriated to the range improvements appropriation. However, the amount cannot exceed the amount appropriated by the annual Interior Department Appropriation Act, which is historically $10 million. The range improvement appropriation is available to the BLM for constructing, purchasing, or maintaining range improvements.

/k/ The payment to Alaska represents receipts in excess of the actual cost of administering the grazing program in the state.

/l/ Appropriated and available to the BLM to lease lands for grazing purposes.

/m/ Revenue from the sale of helium needed to operate the BLM Helium Program is credited to the helium revolving fund as an offsetting collection. Excess revenue is deposited to the general fund receipt account 14-2239, sale of helium.

Table 3-32. RECEIPTS FROM MINING FEES, FISCAL YEAR 2024

Administrative State	Mining Law Holding Fees	Mining Law Nonholding Fees	Total
Alaska	$1,221,568	$16,135	$1,237,703

Table 3-35. FEDERAL COAL LEASES, COMPLIANCE WITH DILIGENT DEVELOPMENT AND CONTINUED OPERATION, FISCAL YEAR 2024–concluded

Note: Data for issuance and categories of federal coal leases are shown in Table 3-18.

/a/ A lessee has 10 years from the date of lease issuance to develop the lease by diligently producing commercial quantities of coal. If production during the first 10 years of the lease is insufficient to meet the initial commercial quantity requirement, the lease will terminate at the end of the 10th year of the lease.

/b/ After commercial quantities of coal have been initially produced from a federal coal lease, the lease must, thereafter, be maintained in continued operation by annually producing at least commercial quantities of coal. The continued operation requirement may be met by actual production of at least commercial quantities of coal from the lease during the year or by cumulative production for the most recent year and the 2 immediately preceding years that is equivalent to or greater than the cumulative annual production of at least the cumulative commercial quantities of coal for the same period.

/c/ Production from anywhere within a logical mining unit (LMU) may be used to comply with the requirement to produce commercial quantities of coal annually from an individual federal coal lease. However, the annual commercial quantities requirement amount will be determined based on the recoverable coal reserves of the LMU rather than on just a singular federal coal lease. Similar to a singular federal coal lease, compliance with the annual production of commercial quantities may be based on the production of the current year or production of the current year and the previous 2 years.

/d/ The continued operation requirement may be suspended by the payment of advance royalty for at least commercial quantities of coal. A lessee may pay advance royalty in lieu of continued operation for no more than 20 years during the life of a lease. Advance royalty may be recouped against production royalties on a dollar basis when coal is next produced.

/e/ The requirement to produce commercial quantities of coal may be suspended if the BLM determines that such a suspension is in the interest of conservation of the coal or other resources. The requirement to produce commercial quantities of coal annually may be suspended if mining operations on the lease are interrupted owing to strikes, the elements, or casualties that are not attributable to the lessee.

/f/ The continued operation requirement ends after all recoverable coal has been mined.

/g/ These leases are not suspended, failed to produce commercial quantities of coal, and failed to pay advance royalty in lieu of continued operation.

/h/ Leases included in this category either had no diligence reported or are an acquired nonfederal lease that has not yet been readjusted to include Federal Coal Leasing Amendments Act diligence requirements.

PART 4

RECREATION AND LEISURE ACTIVITIES

As a national provider of recreational opportunities, the BLM's recreation and visitor services program manages recreation resources and visitor services to offer the greatest benefits possible to individuals and communities and to better enable communities to achieve their own social, economic, and environmental outcomes. The BLM also collaborates with other recreation service providers, such as state parks, county recreation departments, sporting goods dealers, and landowners, to help public land visitors have outstanding recreational experiences. The BLM's commitment to collaborate with other recreation service providers helps reinforce cultural values tied to community identity.

Recreational opportunities on BLM-managed public lands allow visitors to experience a greater sense of self-reliance, an improved sense of resource stewardship, a greater respect for culture, reduced stress, improved physical health, and reduced health maintenance needs. Not only do recreational experiences improve quality of life, but they also strengthen positive social connections. Families and communities may experience greater cohesion and well-being because of recreational experiences—especially youth who are encouraged to connect with the outdoors.

Many BLM-managed areas have been recognized by the BLM, Congress, or the President and have been given special designations (as detailed in Part 5, Natural and Cultural Heritage Preservation) to protect the unique and sensitive values of each area. Recreation facilities, information and interpretive sites, trails, staging areas, and similar places are developed to sustain the distinctive character of public land recreation settings while helping meet key visitor needs and expectations. At many sites and areas, fees are charged to provide for maintenance and improvements. At other sites, generally those public lands without visitor facilities, no fees are charged. Most recreational use on public lands occurs in nonfee areas. Whether the visitor chooses highly developed recreation fee sites or remote wilderness areas where neither fees nor registration are required, the BLM relies heavily on public land users to be stewards of the land, water, and structures so the next person can also have a quality experience. Because some visitors are unfamiliar with outdoor skills or lack the required equipment, the BLM issues special recreation permits to qualified commercial companies to guide visitors on public lands. Special recreation permits are also issued to competitive event organizers and other organized groups to conduct their activities on public lands. In areas where it has been determined that special management actions are required to protect identified resources, individual special recreation permits are issued to help achieve management goals and objectives.

The information in the following tables is intended to provide an overview of recreational use and opportunities on public lands. BLM offices are responsible for collecting and maintaining various data relating to the recreation and visitor services program. These field-level data are aggregated in the BLM's Recreation Management Information System database. Tables 4-1 through 4-3 summarize recreation data from this database and revenue data from the BLM's Collections and Billings System. Table 4-1 presents the estimated visitor use by state; Table 4-2 presents visitor participation in various recreational activities at fee and nonfee areas; and Table 4-3 presents permit and fee revenue data by state and type of authorization. These tables present a picture of the amounts and types of recreational activities on public lands geographically for recreation sites and dispersed areas, and for both fee and nonfee areas.

Table 4-1. ESTIMATED RECREATIONAL USE OF PUBLIC LANDS ADMINISTERED BY THE BLM, FISCAL YEAR 2024–concluded

/a/ The Arizona State Office also administers BLM public lands in California along the Colorado River; the California State Office also administers BLM public lands in northwestern Nevada; the Eastern States Office administers BLM public lands in the 31 states east of and bordering the Mississippi River; the Montana State Office also administers BLM public lands in North Dakota and South Dakota; the New Mexico State Office also administers BLM public lands in Kansas, Oklahoma, and Texas; the Oregon State Office also administers BLM public lands in Washington; and the Wyoming State Office also administers BLM public lands in Nebraska.

/b/ These are recreation sites and other specific areas on public lands managed by the BLM and recognized as "managerially significant," where management actions are required to provide specific recreation setting or activity opportunities, to protect resource values, or to enhance visitor safety. Visitation estimates at these sites and areas are based on a variety of methods, including sampling, fee receipts, registrations, traffic counts, observations, or estimates based on local knowledge.

/c/ Dispersed areas are the remaining public lands that are open to recreational use but may not contain developed or "managerially significant" recreation sites. Visitation estimates in dispersed areas are made using information gained from staff field patrols, data from adjacent land management agencies, or data gathered using social crowd-sourced methods.

/d/ Recreation partnership sites are recreation sites managed primarily by another public entity under the authority of the Recreation and Public Purposes Act or similar cooperative management agreements; the BLM has a significant presence on the parcel (e.g., ranger patrols, signs, brochures). Visitation estimates for partnership sites are based on a variety of methods.

/e/ A visit is the entry of any person onto lands and related waters administered by the BLM for the pursuit of recreational experiences, regardless of duration.

/f/ A visitor day is a common unit of measure of recreational use among federal agencies. One visitor day represents an aggregate of 12 visitor hours to a site or area.

Table 4-2. ESTIMATED RECREATIONAL USE OF BLM-ADMINISTERED PUBLIC LANDS FOR RECREATION ACTIVITIES UNDER VARIOUS FEE AUTHORIZATIONS, FISCAL YEAR 2024–concluded

Note: As of the 2019 edition of *Public Land Statistics*, this table shows recreational use of public lands based on the participation levels for various activity groupings. Previous editions reported recreation activity use based on duration of time (visitor days) for each activity. Reporting visitor days for various activities will overrepresent the amount of use for activities that inherently take longer to complete. For example, two people camping would be reported as more use than two people picnicking because camping takes much longer to complete than picnicking, even though the same number of people participated in each activity. Reporting the number of participants provides a more accurate representation of the level of use for each activity grouping.

This table reports participation rates recorded at fee and nonfee sites and areas, as well as for use associated with special recreation permits. Activity participation (summarized from a list of 99 recreational activities) is based on registrations, permit records, post-season permittee reports, and field observations by field office staff. Since a single individual may participate in more than one activity during a single visit, the total number of public land participants will be greater than the total public land visits shown in Table 4-1.

/a/ A participant is a visitor on a single visit who engages in one or more recreational activities on public land. A single visitor can participate in several activities during a single visit and is counted as a participant in each activity.

/b/ Activity participation occurring at designated standard and expanded amenity fee sites and areas with recreational use permits, special area permits, and fee payment either onsite or using an online payment method.

/c/ Activity participation on public lands subject to authorization under special recreation permit regulations, including the activities of private parties, commercial outfitters and guides, competitive events, organized groups, and other events.

/d/ Activity participation at nonfee sites and dispersed areas when neither permits nor fees are required.

/e/ Percent that each activity group represents of the total amount of public land activity use.

Table 4-3. RECREATION PERMITS, PASSES, AND REVENUE ON PUBLIC LANDS ADMINISTERED BY THE BLM BY STATE, FISCAL YEAR 2024–continued

/a/ The Arizona State Office also administers BLM public lands in California along the Colorado River; the California State Office also administers BLM public lands in northwestern Nevada; the Eastern States Office administers BLM public lands in the 31 states east of and bordering the Mississippi River; the Montana State Office also administers BLM public lands in North Dakota and South Dakota; the New Mexico State Office also administers BLM public lands in Kansas, Oklahoma, and Texas; the Oregon State Office also administers BLM public lands in Washington; and the Wyoming State Office also administers BLM public lands in Nebraska.

/b/ The standard amenity column shows the number of permits issued for use of some visitor centers or interpretive centers, national conservation areas, and other designated recreation areas.

/c/ The expanded amenity column shows the number of permits issued for recreational use of facilities or services provided by the Federal Government, such as campgrounds, boat launches, rentals for cabins, audio tour devices, group day-use sites, stock animals, and other visitor services including reservation services. Audio tour devices include CDs, iPods, radio stations, or other media allowing a visitor to go on a self-guided, interpretive auto tour.

/d/ Special recreation permits are issued for noncommercial use in certain “special areas,” such as long-term visitor areas, off-highway vehicle areas, certain rivers, and backcountry hiking or camping areas.

/e/ Commercial special recreation permits are issued to entities conducting business on public lands for the purpose of providing recreational opportunities or services without permanent facilities. These permits are issued for a period of less than 10 years to outfitters, guides, vendors, and commercial competitive event organizers. Special recreation permits for competitive and organized group events are also included in this category. The permit count includes both permits issued in 2024 and active permits issued in previous fiscal years still in effect during this reporting year. Revenues encompass both active and issued permits for this reporting year.

/f/ The federal interagency recreation pass—America the Beautiful - The National Parks and Federal Recreational Lands Annual Pass—is issued to provide discounts for standard amenity fees and certain expanded amenity fees at federal recreation sites charging such fees. Included in this permit count and revenue are the fees collected for the Northwest Forest Pass in Oregon.

/g/ Federal interagency pass sales and revenue attributed to the BLM Headquarters office represent sales of interagency passes via the internet, mail, and a call center through the recreation.gov website, the U.S. Geological Survey online store, and by third-party vendors.

Table 4-3. RECREATION PERMITS, PASSES, AND REVENUE ON PUBLIC LANDS ADMINISTERED BY THE BLM BY STATE, FISCAL YEAR 2024–concluded

/h/ This value represents the total net revenue recorded in the BLM's Collections and Billings System (CBS) in the recreation commodities associated specifically with permits and pass fees.

/i/ Additional net revenues recorded in the BLM's CBS from miscellaneous sources, including administrative fees, trespass fees, late fees, publication sales, and permit sales not correctly categorized.

/j/ This value represents total revenue recorded in the BLM's CBS as donations to the BLM for recreation-related programs. Recreation program donations are authorized under the Federal Land Policy and Management Act.

/k/ This value represents total net revenue recorded in the BLM's CBS as received by the BLM for recreational use of public lands and donations received for recreation-related programs. Recreation fees are authorized by the Federal Lands Recreation Enhancement Act, and donations are authorized under the Federal Land Policy and Management Act.

Sources: The BLM Recreation Management Information System and the BLM Collections and Billings System.

PART 5

NATURAL AND CULTURAL HERITAGE PRESERVATION

The public lands managed by the BLM encompass some of the most spectacular great open spaces in the United States. They contain exceptional geologic formations, comparatively undisturbed native plant and animal communities, wilderness areas and wild and scenic rivers, national scenic and historic trails, and innumerable archaeological and historical sites. These resources are scientifically, ecologically, culturally, educationally, and recreationally important, representing a significant part of this nation's natural and cultural heritage.

Congress has passed a variety of laws concerning the management and use of these resources, including the Antiquities Act of 1906, Wilderness Act of 1964, National Historic Preservation Act of 1966, Wild and Scenic Rivers Act of 1968, National Trails System Act of 1968, Federal Land Policy and Management Act of 1976, Archaeological Resources Protection Act of 1979, Native American Graves Protection and Repatriation Act of 1990, and Omnibus Public Land Management Act of 2009.

Many of these laws establish procedures for formally recognizing areas that are unique or that contain significant scientific, educational, or recreational values. Some of these designations, including national conservation areas and national monuments, require congressional or Presidential action. Others, such as areas of critical environmental concern, are BLM designations established through land use planning or other administrative procedures. During the past 54 years, beginning with designation of the King Range National Conservation Area, many extraordinary landscapes on our public lands have received protective designations through either an act of Congress or a Presidential proclamation.

National Landscape Conservation System

The BLM established the National Landscape Conservation System (NLCS)—also known as National Conservation Lands—to provide a national framework for managing special areas on the public lands designated by Congress or the President. In 2009, Congress formally established the NLCS with passage of the Omnibus Public Land Management Act. This system includes all of the BLM's national conservation areas and similar designations, wilderness areas, national scenic and historic trails, wild and scenic rivers, national monuments, wilderness study areas, and conservation lands of the California desert. Taken together, there are 905 NLCS units encompassing about 37 million acres of public land.

The BLM manages the National Conservation Lands to conserve, protect, restore, and enhance America's natural and cultural heritage, while providing compatible multiple uses including grazing, oil and gas development, and mining. The National Conservation Lands offer the American people exceptional opportunities for hunting, solitude, wildlife viewing, fishing, learning history, exploration, scientific research, and much more. The BLM manages these public lands for the benefit of current and future generations, which includes respecting the past, present, and future connections that native and traditional communities have to these public lands.

The following tables provide data about the conservation units included in the NLCS:

5-1 National Landscape Conservation System: Number and Size of Designated Areas
5-2 National Monuments within the National Landscape Conservation System
5-3a National Conservation Areas within the National Landscape Conservation System
5-3b Other Conservation Units within the National Landscape Conservation System
5-4 Designated Wilderness within the National Landscape Conservation System
5-5 Wilderness Study Areas within the National Landscape Conservation System
5-6 BLM Wild, Scenic, and Recreational Rivers
5-7 National Scenic and Historic Trails

Natural and Cultural Heritage Administrative Designations
In addition to assuming the responsibilities previously noted, the BLM works to preserve and protect threatened and endangered species, wild free-roaming horses and burros, significant archaeological and historical sites, areas of critical environmental concern, and other outstanding natural areas. Some of those responsibilities are reflected in the following tables.

Tables 5-8a, 5-8b, and 5-8c, Land Exchanges and Acquisitions, show an important component of the BLM's land management strategy. The BLM acquires land and easements in land when it is in the public interest and consistent with publicly approved land use plans. The BLM's land acquisition program is designed to improve management of natural resources by consolidating federal, state, and private lands; to increase recreational opportunities and preserve open space; to secure key property necessary to protect endangered species and promote biological diversity; and to preserve archaeological and historical resources.

Table 5-9 provides a summary of projects using funds under the Southern Nevada Public Land Management Act (SNPLMA) of 1998. The BLM, other federal agencies, and local governments in Clark, Lincoln, and White Pine Counties, as well as portions of Washoe County and Carson City, Nevada, use 85 percent of the revenue generated by land sales under SNPLMA for environmentally sensitive land acquisitions; capital improvements; development and implementation of multispecies habitat conservation plans for Clark County, Nevada; parks, trails, and natural areas; conservation initiatives; Lake Tahoe restoration projects; eastern Nevada landscape restoration projects; and hazardous fuels reduction and wildfire prevention.

Table 5-10a illustrates the number of acres sold and the number of acres acquired as a metric of SNPLMA's success. The act provides for the orderly disposal of certain federal land in Clark County, Nevada, and for the acquisition of environmentally sensitive lands in the State of Nevada.

Table 5-10b lists the number of acres sold and the number of acres acquired under the Lincoln County Land Act of 2000 and the number of acres sold under the Lincoln County Conservation, Recreation, and Development Act of 2004. The acts provide for the orderly disposal of certain federal land in Lincoln County, Nevada, and the expenditure of 85 percent of the revenue generated by land sales for other purposes established by the legislation, including the acquisition of environmentally sensitive lands in the State of Nevada.

Tables 5-12, 5-13a, 5-13b, 5-13c, 5-13d, and 5-13e portray wild horse and burro populations, herd management areas, adoptions, removals, sales, transfers, and fertility control treatments. The BLM is responsible for enforcing the Wild Free-Roaming Horses and Burros Act of 1971 (Public Law 92-195), which provides for the protection, management, and control of wild horses and burros on the public lands. The purpose of the act is to preserve a thriving natural ecological balance on the range.

Tables 5-14a, 5-14b, and 5-14c show the BLM's heritage resources (cultural, paleontology, and museums). The BLM is steward for the Federal Government's most diverse body of cultural resources, including more than half a million recorded historic properties. BLM-managed lands are home to an enormous number of fossil taxa, including more than 10% of all known dinosaur species worldwide. The BLM manages museum collections in both bureau and nonbureau partner repositories.

The BLM provides special management prescriptions for public lands under a variety of special designations such as areas of critical environmental concern, research natural areas, and national natural landmarks. Table 5-15 lists the present areas of critical environmental concern and research natural areas managed by the BLM. Table 5-16 lists numerous types of areas on the public lands that have special management designations that are not encompassed by the NLCS.

Table 5-1. NATIONAL LANDSCAPE CONSERVATION SYSTEM: NUMBER AND SIZE OF DESIGNATED AREAS AS OF SEPTEMBER 30, 2024

/c/ U.S. Forest Service.

/d/ U.S. Forest Service; Agua Caliente Band of Cahuilla Indians (trust/allottee/reservation).

Table 5-2. NATIONAL MONUMENTS WITHIN THE NATIONAL LANDSCAPE CONSERVATION SYSTEM AS OF SEPTEMBER 30, 2024–concluded

/e/ Includes California State Parks and Recreation, California Department of Fish and Wildlife, and University of California land.

/f/ Private lands include 13,900 acres held in trust for the Agua Caliente Band of Cahuilla Indians.

/g/ The proclamation states that the national monument encompasses approximately 506,814 acres. The acres presented represent initial GIS calculations, which could fluctuate due to continual refinement and updates.

Table 5-7. NATIONAL SCENIC AND HISTORIC TRAILS AS OF SEPTEMBER 30, 2024–concluded

/a/ This table is based on total field-estimated mileage for the congressionally designated routes crossing BLM public lands and/or the best available field data for the actual trail locations. The trail mileage accuracy varies, depending on the amount of national trail inventory completed and the unique physical nature of national historic trails.

/b/ The Department of the Interior delegated national trail administration responsibilities to the BLM for the associated trails. These responsibilities are shared with the National Park Service for the Old Spanish National Historic Trail and the El Camino Real de Tierra Adentro National Historic Trail.

Table 5-8a. LAND EXCHANGES AND ACQUISITIONS, FISCAL YEAR 2024

Federal Land and Minerals Patented or Deeded Out through Exchange

State	Number of Patents or Deeds Issued	Number of Acres Patented or Deeded Out	Approved Appraised Value	Cash Equalization Payment Received by the BLM /a/

Hazardous Fuels Reduction and Wildfire Prevention	0	10	$0
Total	**0**	**35**	**$0**
Special Account Reserve			$0
Grand Total Approved			**$0**

Note: The Southern Nevada Public Land Management Act (SNPLMA) (Public Law 105-263) became law in October 1998. The act provides for the disposal of public land within a specific area in the Las Vegas Valley and creates a special account into which 85 percent of the revenue generated by land sales is deposited. Of the remaining 15 percent, 5 percent goes to the State of Nevada general education program, and 10 percent goes to the Southern Nevada Water Authority for water treatment and transmission infrastructure. The special account is not allocated as part of the federal budget process, so any revenue in the account remains available until expended. Special account revenue finances public projects in several categories described in footnote /a/.

Table 5-9. SOUTHERN NEVADA PUBLIC LAND MANAGEMENT ACT SUMMARY OF BUDGET AUTHORITY, FISCAL YEAR 2024–concluded

/a/ Allowable expenditures under the SNPLMA special account include the following:

- Acquisition of environmentally sensitive lands in Nevada, with priority given to lands in Clark County.
- Capital improvements at the Lake Mead National Recreation Area, Desert National Wildlife Refuge, Red Rock Canyon National Conservation Area, Great Basin National Park, and other areas administered by the BLM and the U.S. Forest Service in Clark, Lincoln, and White Pine Counties and the Spring Mountains National Recreation Area.
- Development and implementation of the Multiple Species Habitat Conservation Plan in Clark County.
- Development of parks, trails, and natural areas in Clark, Lincoln, Churchill, and White Pine Counties and in portions Carson City, Nevada, pursuant to a cooperative agreement with a unit of local or regional government.
- Conservation initiatives on federal land in Clark, Lincoln, and White Pine Counties and portions of Carson City, Nevada, administered by the Department of the Interior or the Department of Agriculture.
- Lake Tahoe Restoration Act (Public Law 106-506) projects.
- Hazardous fuels reduction and wildfire prevention within the Lake Tahoe Basin and the Nevada portions of the Carson Range and the Spring Mountains.
- Projects with the Eastern Nevada Landscape Restoration Project, including, but not limited to, fire management, fuels, forests, woodlands, rangelands, aspen and riparian communities, wildlife habitat, soils, and watersheds, on federal lands in White Pine County and/or Lincoln County, Nevada.
- Reimbursement of costs incurred by the BLM for implementation of the act and to clear debris from and protect land within the disposal boundary and land reserved for affordable housing.
- Reimbursement of costs incurred by the Secretary of the Interior in the identification, implementation, and consolidation of federal and nonfederal lands in Churchill County, Nevada.

/b/ All projects completed in FY 2024 received approval and budget authority in Rounds 15 through 17. A round is a cycle or period of time for consideration and approval of projects. Terminated projects are not included in the completed project counts.

/c/ Lake Tahoe Restoration Act projects were funded in Rounds 5 through 12 and 18, during which time the $300 million authorized to be appropriated for projects at Lake Tahoe over 10 years was approved by the Secretary of the Interior and allocated for that purpose. Therefore, no additional funds are being allocated to Lake Tahoe Restoration Act projects.

Table 5-10a. SOUTHERN NEVADA PUBLIC LAND MANAGEMENT ACT LAND DISPOSAL AND ACQUISITIONS, FISCAL YEAR 2024

Land Disposal (1999–2024) /a/

	1999–2023		1999–2024	
	Total	Average/Year	2024	Total
Acres Disposed	32,494 /b/	1,354	602	33,096
Number of Parcels Disposed	930	39	10	940
Gross Disposal Revenue /c/	$4,603,364,717 /d/	$191,806,863	$163,452,305	$4,766,817,022

Environmentally Sensitive Lands Acquired (1999–2024) /e/

	1999–2023	2024	Total
Acres Acquired	71,847	417	72,264

Note: The Southern Nevada Public Land Management Act (SNPLMA) (Public Law 105-263) became law in October 1998. The act provides for the orderly disposal of certain federal lands in Clark County, Nevada, in the Las Vegas Valley within a disposal boundary established by Congress. Revenues from SNPLMA are used for the acquisition of environmentally sensitive lands in the State of Nevada, with a priority for lands in Clark County, and for other purposes established by the legislation. Land has been acquired in several Nevada counties using funds in the SNPLMA special account.

/a/ Land disposal includes auctions (oral, online, sealed bid, and modified competitive), direct sales, sales for recreational or public purposes, affordable housing sales, and exchanges.

The Santini-Burton boundary and the cooperative management area (CMA) boundary (land conveyed to Clark County through SNPLMA legislation) are both wholly within the SNPLMA disposal boundary. When Santini-Burton parcels outside the CMA boundary (but within the SNPLMA disposal boundary) are sold, the acres are included in total acres disposed, but the revenue from sale of those Santini-Burton parcels goes to the United States Treasury for distribution as specified in the Santini-Burton Act.

/b/ Includes the acres disposed through conveyance to Clark County for the CMA and to the city of Henderson for the limited transition area (LTA). This also includes 207 acres conveyed to the cities of Las Vegas and North Las Vegas for their job creation zones.

Table 5-10a. SOUTHERN NEVADA PUBLIC LAND MANAGEMENT ACT LAND DISPOSAL AND ACQUISITIONS, FISCAL YEAR 2024 –concluded

/c/ Reported gross revenue reflects revenue from all disposal methods, including that from recreational and public purposes sales, revenue from conveyances of CMA lands by Clark County, revenue from conveyances of LTA lands by the city of Henderson, revenues for conveyance of job creation zone lands by the city of North Las Vegas, forfeited land sale bid deposits, and nominal proceeds from conveyances of "unknown" mineral rights in the early years of SNPLMA.

Reported gross revenue may reflect deposit amounts only (typically 20 percent of purchase price) for land sales held 6 months or less before the end of the fiscal year, in which case the balance of the purchase price will not be due, and thus not reported as revenue, until the fiscal year they are received. If any sale defaults, the number of acres/parcels disposed will be adjusted in the next fiscal year.

/d/ The "gross disposal revenue" figure includes mineral conveyances, forfeitures, and settlements.

/e/ "Lands acquired" reflects total acres of environmentally sensitive land acquired (both fee and conservation easement) using SNPLMA funds by all SNPLMA-eligible federal land management agencies.

Table 5-10b. LINCOLN COUNTY LAND ACT AND LINCOLN COUNTY CONSERVATION, RECREATION, AND DEVELOPMENT ACT LAND DISPOSAL AND ACQUISITIONS, FISCAL YEAR 2024

	2001–2023	2024	Total
Acres Acquired	1,583	0	1,583

Note: The Lincoln County Land Act (LCLA) (Public Law 106–298) became law in October 2000. The act provides for the orderly disposal of 13,500 acres of federal lands in Lincoln County, Nevada. Revenues from the LCLA are used for the acquisition of environmentally sensitive lands in the State of Nevada, with a priority for lands in Lincoln County, and for other purposes established by the legislation. Land has been acquired in several Nevada counties using funds in the LCLA special account.

The Lincoln County Conservation, Recreation, and Development Act (LCCRDA) (Public Law 108–424) became law in November 2004. The act provides for the orderly disposal of 90,000 acres of federal lands in Lincoln County, Nevada. Additionally, the LCCRDA provided for the disposal of a utility corridor in Lincoln and Clark Counties. Revenues from LCCRDA are used for the purposes established by the legislation.

/a/ Land disposal includes auctions (oral, online, sealed bid, and modified competitive) and direct sales.

/b/ This total reflects sales that occurred in 2001, 2005, 2013, 2014, 2017, 2018, and 2021.

/c/ This average represents seven land sales that occurred in 2001, 2005, 2013, 2014, 2017, 2018, and 2021. Data for 2024 are reported in the next column.

Table 5-10b. LINCOLN COUNTY LAND ACT AND LINCOLN COUNTY CONSERVATION, RECREATION, AND DEVELOPMENT ACT LAND DISPOSAL AND ACQUISITIONS, FISCAL YEAR 2024 –concluded

/d/ Reported gross revenue reflects revenue from all disposal methods.

Reported gross revenue may reflect deposit amounts only (typically 20 percent of purchase price) for land sales held 6 months or less before the end of the fiscal year, in which case the balance of the purchase price will not be due, and thus not reported as revenue, until the next fiscal year. If any sale defaults, the number of acres/parcels disposed will be adjusted in the next fiscal year.

/e/ Total revenue includes the sale of high-value parcels that occurred in the southern part of Lincoln County, near Mesquite, Nevada, in 2001 and 2005. Additional sales are not anticipated to occur in this part of Lincoln County. Based on current sales figures, the average price per acre for future sales is anticipated to be between $300 and $1,500 per acre.

/f/ “Lands acquired” reflects total acres of environmentally sensitive land acquired (both fee and conservation easement) using LCLA funds by all LCLA-eligible federal land management agencies.

Table 5-11. RESERVED

This table number is reserved for use in a future edition of *Public Land Statistics*.

Table 5-12. WILD FREE-ROAMING HORSE AND BURRO POPULATIONS IN HERD MANAGEMENT AREAS AS OF MARCH 1, 2024

Administrative State	Number of HMAs /a/	BLM HMA Acres	Horses	Burros	Total Animals /b/
Arizona	7	1,498,207	229	5,898	6,127
California	21	2,053,082	3,487	3,696	7,183
Colorado	4	365,988	1,322	0	1,322
Idaho	6	383,894	489	0	489
Montana	1	27,094	198	0	198
Nevada	83	14,032,947	33,338	4,685	38,023
New Mexico	2	24,506	455	0	455
Oregon	18	2,733,577	5,092	62	5,154
Utah	19	2,154,458	4,078	227	4,305
Wyoming	16	3,644,013	10,264	0	10,264
Total	**177**	**26,917,766**	**58,952**	**14,568**	**73,520**

Note: Wild horse and burro populations on the range typically increase on average 20 percent per year based on the annual foaling rates.

/a/ Herd management areas (HMAs) are BLM-managed lands where wild horses and burros are managed in conjunction with other resources.

/b/ The best estimate for total population size on March 1, 2024, is 73,520 wild horses and burros. The 90% confidence interval based on typical aerial survey-based uncertainty levels is between 63,418 and 85,229—but totals close to the best estimate are the most likely.

Note: Acreage data are from the Surface Management Agency database, which experiences fluctuations due to continual refinement and updates.

Table 5-16. NUMBER AND SIZE OF NON-NLCS DESIGNATED SPECIAL MANAGEMENT AREAS AS OF SEPTEMBER 30, 2024

Special Management Area	Designation Type	Number	Total Acres	Total Miles
Lake Todatonten Special Management Area	Congressional	1	37,579	
National Natural Landmarks	Administrative	41	391,317	
National Recreation Trails	Administrative	38		583
National Back Country Byways	Administrative	53		2,906 /a/
Globally Important Bird Areas	Administrative	34	7,625,030 /b/	
Significant Caves	Administrative	1,091		
Backcountry Conservation Areas /c/	Administrative	25	999,847	

Note: As of the 2018 edition of *Public Land Statistics*, data regarding herd management areas are now reported in Table 5-12, and data regarding areas of critical environmental concern and research natural areas are reported only in Table 5-15.

/a/ The total miles include those byways administratively designated under the BLM's Back Country Byway Program. In addition, the BLM is involved in the cooperative management of an additional 60 byways, totaling 5,169 miles on public lands, recognized by state or national designations. Collectively, these two categories make up the BLM's byway program.

/b/ The total acres for globally important bird areas do not include 15 BLM-managed important bird areas with unreported acres.

/c/ Backcountry conservation areas are administratively designated areas of intact and undeveloped landscapes with habitat for recreationally important fish and/or wildlife species. These areas are managed to protect and enhance wildlife-dependent recreational opportunities.

Source: Information concerning significant caves comes from the BLM Recreation Management Information System (RMIS).

PART 6

PUBLIC HEALTH, SAFETY, AND RESOURCE PROTECTION

The stewardship role of the BLM, which includes preserving and protecting natural and cultural resources, also extends to protecting public health, safety, and property. The BLM is responsible for reducing health and safety risks to employees and the public; maintaining facilities and infrastructure; and protecting public lands from illegal dumping of wastes, theft and destruction of federal property, misuse of resources, and wildland fires.

Table 6-1a summarizes the number of wildfires and acres burned on federally managed lands and those that affected BLM-administered lands. In 2024, wildfires involving all agency jurisdictions in states with BLM-managed public lands burned 6,709,493 acres. Of the total acres burned, 4,416,133 acres were naturally caused, and 2,293,360 acres were human caused. Oregon had the most wildfire activity in 2024, with 1,971,677 acres burned by wildfires involving 519,176 acres of BLM-managed lands. Idaho was the second most impacted state, with 1,060,516 acres burned by wildfires involving 265,842 acres of BLM-managed lands. A total of 1,148,719 acres of BLM-managed lands burned in 2024.

Table 6-1b summarizes the acres of fuels management completed by the BLM. In FY 2024, the BLM fuels management program completed 1,371,623 acres of active fuels management to protect communities and natural resources from wildfires.

Table 6-2 identifies the major types of capital improvements that support the management, use, and enjoyment of the public lands for commercial, recreational, and other purposes. The trend has been for the BLM's inventory of fixed capital assets (buildings, roads, recreation sites, etc.) to increase over time. However, as the BLM continues to implement its Asset Management Plan, assets that are no longer critical to the mission or assets in poor condition that are no longer cost effective to maintain are identified for disposal. The Asset Management Plan provides the framework for the BLM to streamline its portfolio of assets and optimize the maintenance of those assets that contribute most significantly to the BLM's mission and strategic goals.

Table 6-3 summarizes the releases of hazardous substances and other pollutants and contaminants discovered on public lands. Historically, approximately 60 percent of all hazardous waste sites on public lands result from commercial uses. Landfills, mines and mill sites, airstrips, and oil and gas sites account for almost half of these commercial activities. In addition, the other 40 percent of hazardous waste is caused by illegal activities, such as dumping of agricultural and industrial wastes, wire burning, shooting areas, and illicit drug production. In recent years, about 90 percent of the hazardous substance releases found on public lands have resulted from illegal dumping incidents involving debris or drums of biomedical, chemical, and petroleum wastes and pesticides, paints, batteries, asbestos, and illicit drug lab wastes. The remaining 10 percent of the hazardous substance releases have come from fuel spills, mining wastes, and military accidents.

Table 6-1a. WILDFIRES THAT BURNED FEDERALLY MANAGED LANDS IN 2024

Summary across All Jurisdictions /a/

Note: Beginning with the 2020 edition, the Wildland Fire Management Information system was replaced with the Interagency Fire Occurrence Reporting Modules (InFORM) for wildland fire reporting to improve the quality, completeness, and usability of data. While the reporting capability underwent upgrades before full activation, some data were not available for reporting purposes. Therefore, the National Interagency Coordination Center Annual Report was used to compile total wildfire acre data. Beginning with the 2023 edition, InFORM data were used to report wildfire numbers and acres.

Table 6-1a. WILDFIRES THAT BURNED FEDERALLY MANAGED LANDS IN 2024–concluded

/a/ Includes all agency jurisdictions. Acres are recorded by protecting agency, which is the entity responsible for providing direct incident management and services to a given area pursuant to its jurisdictional responsibility or as specified by law, contract, or agreement.

/b/ In 2020, the fire cause data standard was updated to include an "undetermined" cause. For reporting purposes using InFORM data, undetermined causes are included in the human-caused wildfire totals.

/c/ BLM acres burned were calculated by intersecting the 2024 fire perimeters with the BLM Surface Management Agency data. Fire perimeter data were obtained from the Wildland Fire Interagency Geospatial Services (WFIGS).

Sources: InFORM, WFIGS, and BLM Surface Management Agency data.

Table 6-1b. ACRES OF FUELS MANAGEMENT COMPLETED BY THE BLM, FISCAL YEAR 2024

Total	**459,982**	**137,124**	**504,948**	**158,343**	**3,495**	**107,731**	**1,371,623**

Note: This table was previously numbered 6-1c. It became 6-1b as of the 2023 edition and still reports the same information. The prior 6-1b, which reported the number of BLM and other agency responses to reported wildfires, was temporarily removed in 2020 and was officially removed as of the 2023 edition since the data are no longer available.

This table excludes acres burned for resource benefit, referred to as “fire use” acres. Acres burned for resource benefit are achieved when an active wildfire burns through a planned treatment area or if a wildfire meets land use plan objectives.

Source: National Fire Plan Operations and Reporting System.

Table 6-3. RELEASES OF HAZARDOUS SUBSTANCES ON PUBLIC LANDS, FISCAL YEAR 2024–concluded

/a/ Includes sites reported and sites archived in previous years and during FY 2024.

/b/ Includes work done by the BLM, other federal and state agencies, and responsible parties during FY 2024 only.

/c/ Cases opened and potentially actionable under the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) of 1980, commonly known as the Superfund.

/d/ The "No Further Action Planned" designation is commonly given to cases closed and administratively archived.

/e/ Includes CERCLA multiphase investigations and searches for potentially responsible parties.

/f/ Removal actions are relatively short-term, rapid responses to a release or threat of release.

/g/ Remedial actions are longer term responses consistent with a permanent remedy.

/h/ The number of sites reported for Alaska in recent years changed significantly due to implementation of two actions taken by the state office. BLM Alaska developed and initiated a programmatic inventory of closed mine claims in 2019, which resulted in adding hundreds of new sites. In 2021, the Alaska State Office initiated a detailed review of the AK Hazardous Materials Management/ Abandoned Mine Lands Database, which archives all BLM sites in the state. The database review was completed in 2022 and resulted in removal of dozens of legacy sites and features that could not be verified using existing reports, plans, and correspondence. The net effect of the inventory and database review resulted in an increase in the number of sites on land managed by the BLM in Alaska. The statewide inventory program managed by the state office continued through 2023.

/i/ Petroleum products are CERCLA hazardous substances under California state law; data for California include oil spills.

/j/ Includes 61 illegal dumps and illegal cannabis sites.

/k/ The South Dakota Field Office inventoried and assessed hundreds of mine features to verify presence/absence of hazardous materials. Hazardous materials concerns were not encountered at most sites.

/l/ Initial searches/revisits on a financial assistance agreement.

GLOSSARY

acquired lands: lands in federal ownership that were obtained through purchase, condemnation, gift, or exchange. Acquired lands constitute one category of public lands. (See public lands.)

administrative site: a reservation of public lands for use as a site for public buildings, ranger stations, or other administrative facilities.

administrative state: Bureau of Land Management state office having administrative jurisdiction. For example, the Montana State Office has administrative jurisdiction of BLM-managed public lands in Montana, North Dakota, and South Dakota.

allocation of receipts: determination of monies paid, or to be paid, to other funds, counties, or states out of receipts collected during the fiscal year reported, as required or specified by law.

animal unit month: the amount of forage needed to sustain one cow, five sheep, or five goats for 1 month.

application: a formal request for rights to use, or obtain eventual title to, public lands or resources.

archaeological and historical site: a site that contains objects of antiquity or cultural value relating to history or prehistory that warrants special protection.

area of critical environmental concern: the principal designation for public lands where special management is required to protect and prevent irreparable damage to important historical, cultural, or scenic values; fish or wildlife resources; or natural systems or processes or to protect life and safety from natural hazards.

auction: a sale of land through competitive bidding.

backcountry conservation area: administratively designated area of intact and undeveloped landscape with habitat for recreationally important fish and/or wildlife species. These areas are managed to protect and enhance wildlife-dependent recreational opportunities.

boating: motorized boating includes tour boating, power boating, river running (commercial or noncommercial), etc. Nonmotorized boating includes sailing, canoeing, kayaking, and river running (commercial and noncommercial) and activity by other nonmotorized boats, such as rowboats.

bonus: the cash consideration paid to the United States by the successful bidder for a mineral lease, such payment being made in addition to the rent and royalty obligations specified in the lease.

cadastral survey: a survey relating to land boundaries and subdivisions made to create units suitable for management or to define the limits of title. The distinguishing features of the cadastral surveys are the establishment of monuments on the ground to define the boundaries of the land and their identification in the records by field notes and plats.

camping: includes auto and trailer camping, along with other camping at developed sites, and backcountry camping.

candidate species: species designated as candidates for listing as threatened or endangered by the U.S. Fish and Wildlife Service or National Marine Fisheries Service. (See endangered species and threatened species.)

CCF: a unit of measurement that stands for 100 cubic feet; 1 board foot measures 1 foot in length by 1 foot in width by 1 inch in thickness, which is equivalent to 1.6 CCF. (See MBF.)

certificate: the document that passes title to the selected lands to the state; or a document that attests to the truth or authenticity of the papers attached to it.

competitive leasing: refers to leases issued by the United States where there are known minerals (or other resources such as oil and gas) or where inference of probable resources can be drawn from knowledge of the geology of the land. The lands are offered for lease by competitive bidding after publication of the offer of the lands for leasing. The lease is issued to the highest bidder, who is determined by auction. (See lease and noncompetitive leasing.)

contract protection (fire): fire protection given to lands owned, leased, or controlled by the United States and administered by the Bureau of Land Management on which complete fire protection is extended through the use of fire protection forces and facilities contracted for by the Bureau of Land Management.

cultural resources: remains of human activity, occupation, or endeavor that are reflected in districts, sites, structures, buildings, objects, artifacts, ruins, works of art, architecture, and natural features that were of importance in past human events. These resources consist of (1) physical remains, (2) areas where significant human events occurred, even though evidence of the event no longer remains, and (3) the environment immediately surrounding the actual resource.

disposition: a transaction that leads to the transfer of title of public lands, or resources on or in these lands, from the Federal Government.

Eastern States: includes all states bordering on or east of the Mississippi River.

emergency fire stabilization and rehabilitation: any action taken to ameliorate the impacts of a wildfire to the land, including the physical and biological resources. These actions can include exclusion fencing, soil stabilization (such as revegetation), and watershed protection measures. Fire rehabilitation actions are necessary to prevent unacceptable resource degradation, minimize threats to public health and safety, prevent unacceptable offsite damage, and minimize the potential for the recurrence of wildfire.

endangered species: any animal or plant species in danger of extinction throughout all or a significant portion of its range. (See candidate species and threatened species.)

exchange: a transaction whereby the Federal Government receives land or interests in land in exchange for other land or interests in land.

exchange lease: an exchange of resources when it is in the public interest to shift the impact of mineral operations from leased lands, or portions of leased lands, to currently unleased lands to preserve public resource or social values, and to carry out congressional directives authorizing lease exchanges.

federal land: all classes of land owned by the Federal Government.

fishing: includes fishing from the shore and from a boat when the boating is secondary to the fishing activity. Included are warm water, cold water, and ice fishing; crabbing; seining; and gigging.

free-use permit: a permit to a governmental agency or nonprofit group to use mineral materials, such as sand and gravel, or other resources at no charge.

fuels management: act or practice of controlling flammability and reducing resistance to control of wildland fuels through mechanical, chemical, biological, or manual means, or by prescribed fire, in support of land management objectives.

globally important bird areas: a network of sites and areas in North America identified and protected to maintain naturally occurring bird populations across the ranges of those species. These areas are important for maintaining critical habitats and ecosystems. This network of areas encompasses lands critical to the conservation of some bird species and may include the best examples of the species' habitat. These areas help ensure species' survival.

grazing district: an administrative subdivision of the rangelands under the jurisdiction of the Bureau of Land Management established pursuant to Section 3 of the Taylor Grazing Act to facilitate the management of rangeland resources.

grazing fee year: March 1 of a given calendar year through the last day in February of the following year.

grazing lease: an authorization that permits the grazing of livestock on public lands outside the grazing districts during a specified period (Section 15 of the Taylor Grazing Act).

grazing lease lands: lands outside grazing districts that are owned, leased, or otherwise controlled by the United States and administered by the Bureau of Land Management and that are subject to leasing for grazing purposes under the Alaska Livestock Grazing Act of March 4, 1927; Section 15 of the Taylor Grazing Act of June 28, 1934; O&C Lands Act of August 28, 1937; or Reindeer Act of September 1, 1937.

grazing permit: an authorization that permits the grazing of a specified number and class of livestock on a designated area of grazing district lands during specified seasons each year (Section 3 of the Taylor Grazing Act).

hardrock minerals: locatable minerals that are neither leasable minerals (oil, gas, coal, oil shale, phosphate, sodium, potassium, sulphur, asphalt, or gilsonite) nor salable mineral materials (common variety sand and gravel). Hardrock minerals include, but are not limited to, copper, lead, zinc, magnesium, nickel, tungsten, gold, silver, bentonite, barite, feldspar, fluorspar, and uranium. (See locatable minerals.)

hazardous fuels reduction: includes the Bureau of Land Management's efforts to use fire as a critical natural process to maintain and restore ecosystems, rangelands, and forest lands and to reduce the hazardous buildup of fuels that may threaten healthy lands and public safety.

herd management areas: areas established for wild free-roaming horses and burros through the land use planning process. The Wild Free-Roaming Horses and Burros Act of 1971 requires that wild free-roaming horses and burros be considered for management where they were found at the time Congress passed the act. The Bureau of Land Management initially identified 264 areas of use as herd areas.

homestead entry, original: an original entry under the homestead laws; the first homestead entry that was made by an individual; or a homestead entry that was made pursuant to the first homestead law, the act of May 20, 1862 (12 Stat. 392), as codified in Sections 2289–2291 of the Revised Statutes. (See stock raising homestead.)

human-caused fire: any fire caused directly or indirectly by a person(s). (See wildfire).

hunting: includes big- and small-game hunting, waterfowl hunting, and trapping.

Indian trust land: land held in trust by the United States for the beneficial use of an individual Indian landowner or tribe.

inholdings: privately owned or state-owned lands located within the boundary of lands owned by the United States.

lake (or pond): a natural standing body of water.

Lake Todatonten Special Management Area: Congress authorized the creation of the Lake Todatonten Special Management Area—a 37,579-acre parcel of public land in Interior Alaska for the protection of fish, wildlife, and habitat—in its Omnibus Parks and Public Lands Management Act of 1996 (Public Law 104-333). Public Land Order No. 7372 withdrew the land for creation of the area on December 15, 1998.

land utilization project lands: privately owned submarginal farmlands incapable of producing sufficient income to support the family of a farm owner and purchased under Title III of the Bankhead-Jones Farm Tenant Act of July 22, 1937. These acquired lands became known as "land utilization projects" and were subsequently transferred from the jurisdiction of the U.S. Department of Agriculture to the U.S. Department of the Interior. They are now administered by the Bureau of Land Management.

leasable minerals: oil and gas; oil shale; coal; potash; phosphate; sodium; sulfur in Louisiana and New Mexico; gold, silver, and quicksilver in certain private land claims; and silica deposits in certain parts of Nevada. (See mineral permit.)

lease: an authorization to possess and use public land for a period of time sufficient to amortize capital investments in the land. (See competitive leasing and noncompetitive leasing.)

license: an authority granted by the United States to do a particular act or series of acts on public lands without the licensee possessing any estate or interest in the land itself.

locatable minerals: whatever are recognized as minerals by the standard authorities, whether metallic or other substances, and are found in sufficient quantity and quality to justify their location under the General Mining Act of 1872, as amended. (See hardrock minerals.)

lode claim: a mining claim located for "veins or lodes of quartz or other rock in place" (30 U.S.C. 23). Lode claims may extend for 1,500 feet along the strike of the vein or lode and to a maximum of 300 feet on either side of the vein or lode.

logical mining unit: an area of land in which the recoverable coal reserves can be developed in an efficient, economical, and orderly manner as a unit with due regard to conservation of coal reserves and other resources. May consist of one or more federal coal leases and may include intervening or adjacent lands in which the United States does not own the coal. All lands in a logical mining unit are under the control of one operator or lessee, can be developed as a single operation, and are contiguous. Formation of logical mining units was authorized by the Federal Coal Leasing Amendments Act of 1976, which amended the Mineral Leasing Act of 1920 (30 U.S.C. 181 et seq.).

MBF: a unit of measurement that stands for 1,000 board feet; 1 board foot measures 1 foot in length by 1 foot in width by 1 inch in thickness. It is the standard unit of measurement in the logging and lumber industry by which standing timber is measured and sold and manufactured lumber is merchandised. (See CCF.)

mill site: a site located on nonmineral land and used for mining or milling purposes (30 U.S.C. 42). Mill sites are limited to 5 acres and may be located either by metes and bounds or by legal subdivision.

mineral materials: minerals such as common varieties of sand, stone, gravel, pumice, pumicite, and clay that are not obtainable under the mining or leasing laws but that can be obtained under the Materials Act of 1947, as amended. (See salable minerals.)

mineral permit: a permit that authorizes prospecting for certain leasable minerals on public lands. (See leasable minerals.)

mineral reservation: retention of the mineral estate by the grantor of a property; the grantee or patentee owns the land surface but not the minerals.

minerals: organic and inorganic substances occurring naturally, with characteristics and economic uses that bring them within the purview of mineral laws; substances that may be obtained under applicable laws from public lands by purchase, lease, or preemptive entry.

mining claim: a mineral entry and appropriation of public land under the General Mining Act of 1872, as amended (30 U.S.C. 22 et seq.). The four types of mining claims include: lode claims, placer claims, mill sites, and tunnel sites. Only tunnel sites may not be patented. A valid lode or placer claim contains a discovery of a valuable mineral deposit subject to location under the General Mining Act of 1872. A valid mill site is one that is being used for the support of a mining or milling operation. A valid tunnel site is one that is being diligently worked and maintained.

mining claim location: the staking and recordation of a lode or placer claim, mill site, or tunnel site on public land. A valid location is one that is properly located, recorded, and maintained under section 314 of the Federal Land Policy and Management Act of October 21, 1976, and the mining laws of the state where the claim or site is located.

multiple use: a combination of balanced and diverse resource uses that takes into account the long-term needs of future generations for renewable and nonrenewable resources, including recreation, range, timber, minerals, watershed, and wildlife and fish, along with natural scenic, scientific, and historical values.

national back country byways: a program developed by the Bureau of Land Management to complement the Department of Transportation's National Scenic Byway program. The Bureau of Land Management's byways show enthusiasts "the best the West has to offer"—including waterfalls and geology sculpted by ancient volcanoes, glaciers, and rivers. Back country byways vary from narrow, graded roads that are only passable during a few months of the year, to two-lane paved highways providing year-round access.

national conservation areas: areas that are part of the National Landscape Conservation System—also known as National Conservation Lands—that are managed to conserve, protect, and restore the exceptional scientific, recreational, cultural, historical, and ecological values for which they were designated.

national historic trails: trails that are part of the National Landscape Conservation System—also known as National Conservation Lands. These trails follow, as closely as possible, the original trails or routes of travel of national historic significance and are managed to preserve the remnants of nationally significant pathways and the settings in which they are located.

National Landscape Conservation System: public lands managed by the Bureau of Land Management that have received special designation for their scientific, cultural, educational, ecological, and other values. Also known as National Conservation Lands, this system was formally established by Title II of the Omnibus Public Land Management Act of 2009 and includes national monuments, national conservation areas, wilderness areas, wilderness study areas, national wild and scenic rivers, national scenic and historic trails, and other units.

national monuments: areas that are part of the National Landscape Conservation System—also known as National Conservation Lands—that are designated to protect objects of scientific and historic interest by proclamation of the President under the Antiquities Act of 1906 or by Congress through legislation. Designation provides for the management of these features and values.

national natural landmark: an area having national significance because it represents one of the best known examples of a natural region's characteristic biotic or geologic features. National natural landmarks must be located within the boundaries of the United States or on the continental shelf and are designated by the Secretary of the Interior. To qualify as a national natural landmark, the area must contain an outstanding representative example of the nation's natural heritage, including terrestrial communities, aquatic communities, landforms, geological features, habitats of native plant and animal species, or fossil evidence of the development of life on earth.

national recreation areas: areas designated by Congress to ensure the conservation and protection of natural, scenic, historic, pastoral, and fish and wildlife values and to provide for the enhancement of recreational values.

national recreation trails: trails established administratively by the Secretary of the Interior to provide for a variety of outdoor recreation uses in or reasonably close to urban areas. They often serve as connecting links between national historic trails and national scenic trails.

national scenic trails: trails that are part of the National Landscape Conservation System—also known as National Conservation Lands. These trails are established by an act of Congress and are intended to provide for maximum outdoor recreation potential and for the conservation and enjoyment of nationally significant scenic, historical, natural, and cultural qualities of the areas through which these trails pass. National scenic trails may be located to represent desert, marsh, grassland, mountain, canyon, river, forest, and other areas, as well as landforms that exhibit significant characteristics of the physiographic regions of the nation.

national wild and scenic rivers: rivers that are part of the National Landscape Conservation System—also known as National Conservation Lands. They are also designated in the National Wild and Scenic Rivers System and are classified in one of three categories, depending on the extent of development and accessibility along each section. In addition to being free flowing, these rivers and their immediate environments must possess at least one outstandingly remarkable value: scenic, recreational, geologic, fish and wildlife, historical, cultural, or other similar values.

Native allotment: an allocation of a parcel of public lands or Indian reservation lands to an American Indian for individual use.

noncompetitive leasing: refers to leases issued to qualified applicants for lands not specifically known or presumed to contain mineral or petroleum deposits in quantity. Such leases can be issued on a first-come, first-served basis or through a random drawing procedure. (See competitive leasing and lease.)

non-exclusive sites: mineral material disposal areas, such as community pits or common use areas, that are designated, maintained, and managed by the Bureau of Land Management and from which many small disposals are authorized under the Materials Act of 1947, as amended.

non-operating revenue: receipts of a miscellaneous nature, such as incidental receipts from taxes, fines, etc., that are not related specifically to, or received in the process of, conducting the normal and regular business of the Bureau of Land Management as it pertains to the management of public lands and resources.

nonuse: an authorization issued to an applicant for nonuse of grazing privileges in whole or part; usually issued for one grazing season.

obligations: payments, and amounts that the Government is obligated to pay, for goods and services received (or contracted for future delivery), made from appropriations during the fiscal year indicated.

Oregon and California (O&C) lands: public lands in western Oregon that were granted to the Oregon central railroad companies (later the Oregon & California Railroad Company) to aid in the construction of railroads but that were later forfeited and returned to the Federal Government by revestment of title. The term "O&C" lands, as is often used, also refers to the reconveyed Coos Bay Military Wagon Road lands, which are public lands in western Oregon that were once granted to the State of Oregon to aid in the construction of the Coos Bay Military Wagon Road but that were later forfeited and returned to federal ownership by reconveyance.

original survey: a cadastral survey that creates land boundaries and establishes them for the first time.

outstanding natural area: protected lands designated either by Congress or administratively by an agency to preserve exceptional, rare, or unusual natural characteristics and to provide for the protection or enhancement of natural, educational, or scientific values. These areas are protected by allowing physical and biological processes to operate, usually without direct human intervention.

paleontology: a science dealing with the life of past geological periods as known from fossil remains.

participant (recreation): a visitor on a single visit who engages in one or more recreational activities on public land. A single visitor can participate in several activities during a single visit and is counted as a participant in each activity.

patent: a Federal Government deed; a document that conveys legal title to public lands to the patentee. Public domain lands are patented; acquired lands are deeded by the Federal Government.

permit: a revocable authorization to use public land for a specified purpose.

placer claim: a mining claim located for "all forms of deposit, excepting veins of quartz, or other rock in place" (30 U.S.C. 35). A placer claim must generally be located by legal subdivision in conformance with the public land survey rather than by metes and bounds. A placer claim is limited to 20 acres per individual, although a placer claim may be as big as 160 acres for an association of 8 or more persons. Corporations are limited to 20-acre claims.

plugged wells: refers to new wells that have been drilled to total depth during the reporting period and that did not encounter oil or gas in paying quantities. Approved plugging and abandonment may or may not have yet occurred.

prescribed fire: any fire intentionally ignited by management actions in accordance with applicable laws, policies, and regulations to meet specific objectives.

private leases: refers to oil and gas leases between private parties that are in existence at the time the Federal Government purchases the mineral estate along with the surface as part of a Federal Government acquisition, for which a Bureau of Land Management serial number is assigned.

producible and service holes: wells with one or more producible oil or gas service completions.

producible completions (oil and gas): separate completions existing on producible (i.e., physically and mechanically capable of production of oil or gas) or service wells at the end of the reporting period; or separate completions that are made during the reporting period on newly drilled wells.

producible leases: leases that have at least one producible well actually located within the lease, as of the last day of the reporting period; includes producible leases that received allocated production from wells located off the lease and that have no producible wells actually located on the lease, as of the last day of the reporting period.

protraction diagram: a diagram representing the plan of extension of cadastral surveys over unsurveyed public lands based on computed values for the corner positions.

public domain lands: original public domain lands that have never left federal ownership; lands in federal ownership that were obtained in exchange for public domain lands or for timber on public domain lands; one category of public lands. (See public lands.)

public land states: the 30 states that made up the public domain at its greatest extent: Alabama, Alaska, Arizona, Arkansas, California, Colorado, Florida, Idaho, Illinois, Indiana, Iowa, Kansas, Louisiana, Michigan, Minnesota, Mississippi, Missouri, Montana, Nebraska, Nevada, New Mexico, North Dakota, Ohio, Oklahoma, Oregon, South Dakota, Utah, Washington, Wisconsin, and Wyoming.

public lands: any land and interest in land owned by the United States and administered by the Secretary of the Interior through the Bureau of Land Management, without regard to how the United States acquired ownership, except for (1) lands located on the Outer Continental Shelf and (2) lands held for the benefit of Indians, Aleuts, and Eskimos. Includes public domain lands and acquired lands (see definitions).

receipts: all money received and credited to the proper account as required by law. Does not include collections held by the U.S. Treasury pending future determination of disposition by the Bureau of Land Management.

reclamation homestead: under the act of June 17, 1902 (32 Stat. 388; 43 U.S.C. 643 et seq.), provides for the issuance of patents to applicants who settle on and improve agricultural public land parcels not exceeding 160 acres within reclamation projects.

reforestation: the reestablishment of forest cover, either naturally or artificially.

rental: the amount paid periodically (usually annually) by the holder of a lease or right-of-way grant for the right to use land or resources for the purposes set out in the lease or grant.

research natural area: a type of area of critical environmental concern that is established and maintained for the primary purpose of research and education because the land has one or more of the following characteristics: a typical representation of a common plant or animal association; an unusual plant or animal association; a threatened or endangered plant or animal species; a typical representation of common geologic, soil, or water features; or outstanding or unusual geologic, soil, or water features.

reserved lands: federal lands that are dedicated or set aside for a specific public purpose or program and that are, therefore, generally not subject to disposition under the operation of all of the public land laws. (See revocation and withdrawal.)

reservoir: a human-made, standing body of water with water levels that may be controlled.

resurvey: a cadastral survey to identify and re-mark the boundaries of lands that were established by a prior survey.

revocation: generally, an action that cancels a previous official act; specifically, an action that cancels a withdrawal. Revocation is usually done in conjunction with restoration, which opens the public lands. (See reserved lands and withdrawal.)

right-of-way: a permit or an easement that authorizes the use of lands for certain specified purposes, such as the construction of forest access roads or a gas pipeline.

riparian area: lands adjacent to creeks, streams, and rivers where vegetation is strongly influenced by the presence of water. Excluded are such sites as ephemeral streams or washes that do not exhibit the presence of vegetation dependent on free water in the soil. Riparian areas constitute less than 1 percent of the land area in the western part of the United States.

salable minerals: sand, gravel, stone, soil, and other common-variety mineral materials disposed of through sales at not less than their appraised price or through free-use permits (see definition). (See mineral materials.)

sale of materials: a competitive or noncompetitive sale by contract at not less than the appraised price of materials (timber and mineral) under the Materials Act of 1947, as amended.

sawtimber: logs of sufficient size and quality to be suitable for conversion into lumber or veneer.

service completion or hole: separate service completions that are for the benefit of oil and gas operations, such as water disposal, salt water disposal, water injection, gas injection, water source, steam injection, or monitoring.

small tract lease: a parcel of public lands of 5 acres or less that has been found to be chiefly valuable for sale or lease as a home, cabin, camp, recreational, convalescent, or business site under the act of June 1, 1938.

special land use permit: a permit that authorizes the use of public land for a purpose not specifically authorized under other regulation or statute.

special recreation permit: a permit that authorizes the recreational use of an area and is issued pursuant to the regulations contained in 43 CFR 8372 and 36 CFR 71. Under the Land and Water Conservation Fund Act, implemented by these regulations, special recreation permits are required for all commercial use, for most competitive events, and for the individual, noncommercial use of special areas where permits are required.

special surveys: cadastral surveys that involve unusual application of, or departure from, the rectangular system. They often carry out the provisions of a special legislative act and include such work as small tract surveys; townsite surveys; island and omitted land surveys; homestead, homesite, trade, and manufacturing site surveys; and also the survey and resurvey of portions of sections. Alaska special surveys are metes and bounds surveys of areas settled on or applied for under certain special land laws applicable to the State of Alaska.

state office: the first-level administrative unit of the Bureau of Land Management field organization. It comprises a geographic area consisting of one or more states.

stock raising homestead: a homestead not exceeding 640 acres initiated under the Stock Raising Homestead Act of 1916, which provided for the homesteading of lands chiefly valuable for grazing and for raising forage crops. Minerals in these lands were reserved to the United States. The provisions for stock raising homesteads were by implication repealed by the Taylor Grazing Act. (See homestead entry, original.)

sustained yield: the achievement and maintenance in perpetuity of a high-level annual, or regular periodic, output of the various renewable resources of the public lands consistent with multiple use.

threatened species: any animal or plant species likely to become endangered within the foreseeable future throughout all or a part of its range. (See candidate species and endangered species.)

trespass: an unauthorized use of federal lands or resources.

tunnel site: a site located for the development of a vein or lode or for the anticipated discovery of previously unknown veins or lodes. The locator of a tunnel site is given the right to all veins cut by the tunnel within 3,000 feet of its portal and up to 1,500 feet along the length of each blind vein or lode cut. A tunnel site location lapses if not worked for a period of at least 6 months.

visit (recreation): the entry of any person onto lands and related waters administered by the Bureau of Land Management for the pursuit of recreational experiences, regardless of duration.

visitor hour: a unit used to measure duration of recreation use. A visitor hour involves the presence of a person on a recreation area or site for the purpose of engaging in recreation activities for either continuous, intermittent, or simultaneous periods aggregating 60 minutes. One visitor day represents an aggregate of 12 visitor hours at a site or area.

water activities (other than boating or fishing): includes swimming, general water play, waterskiing, ski jumping, and other similar activities that occur outside a boat.

wetlands: permanently wet or intermittently flooded areas where the water table (fresh, saline, or brackish) is at, near, or above the soil surface for extended intervals; where hydric wet soil conditions are normally exhibited; and where water depths generally do not exceed 2 meters (about 6 ½ feet). Marshes, shallows, swamps, muskegs, lake bogs, and wet meadows are examples of wetlands.

wilderness: an area of undeveloped federal land retaining its primeval character and influence, without permanent improvement or human habitation, that is protected and managed so as to preserve its natural conditions and that (1) generally appears to have been affected primarily by the forces of nature, with the imprint of human work substantially unnoticeable; (2) has outstanding opportunities for solitude or a primitive and unconfined type of recreation; (3) has at least 5,000 acres of land or is of sufficient size as to make practicable its preservation and use in an unimpaired condition; and (4) may also contain ecological, geological, or other features of scientific, educational, scenic, or historical value.

wilderness study area: an area having the following characteristics: (1) size—roadless areas of at least 5,000 acres of public lands or of a manageable size; (2) naturalness—generally appears to have been affected primarily by the forces of nature; and (3) opportunities—provides outstanding opportunities for solitude or primitive and unconfined types of recreation. The Federal Land Policy and Management Act of 1976 directs the Bureau of Land Management to inventory and study its roadless areas for wilderness characteristics.

wildfire: an unplanned, unwanted wildland fire, including unauthorized human-caused fires, escaped wildland fire use events, escaped prescribed fire projects, and all other wildland fires in which the objective is to extinguish the fire. (See human-caused fire.)

wild free-roaming horses and burros: all unbranded and unclaimed horses and burros using public lands as all or part of their habitat.

wildland: an area in which development is essentially nonexistent, except for roads, railroads, powerlines, and similar transportation structures.

wildland urban interface: the line, area, or zone where structures and other human development meet or intermingle with undeveloped wildland or vegetative fuels. Describes an area within or adjacent to private and public property where mitigation actions can prevent damage or loss from wildfire.

winter sports: includes ice skating, skiing (downhill and cross country), snowboarding, snowshoeing, sledding, snowmobiling, and tobogganing, as well as activities such as snow sculpture and general snow play.

withdrawal: an action that restricts the disposition of public lands and that holds them for specific public purposes; also, public lands that have been dedicated to public purposes. (See reserved lands and revocation.)

woodlands: forest lands usually supporting open-grown, widely scattered trees of marginal merchantability and generally more valuable for watershed or wildlife protection purposes than for the production of timber for commercial purposes.
